WeatherWise Product Range

At WeatherWise, we offer a range of weatherstrips designed to meet the diverse needs of our clients, each tailored to specific environments and applications:

Non-Siliconised Wool Pile:

An excellent option for moderate climates, this weatherstrip provides reliable protection against air, dust, and insects. Its straightforward design offers essential functionality without additional treatments.

Non-Siliconised Straight Brush:

This variant features a straight brush structure that facilitates smooth operation for windows and doors, while maintaining robust protection from dust and moisture.

Siliconised Wool Pile:

Engineered for areas with higher moisture exposure, this premium option offers superior flexibility and enhanced water resistance, ensuring longer-lasting protection in demanding conditions.

Fin Pile Weatherstrips:

Built for extreme weather environments, this variety features an additional layer of fabric or polyethylene that significantly improves sealing performance, reducing air and water infiltration with exceptional efficiency.
