

RYCCA®

THE BEAUTY OF ITALIAN FINISH

ITALIAN WOOD COATINGS

Rycca targets a wide range of customers including home owners, automobiles, corporates, whole-sellers and distributors

www.ryccaitaly.com

OUR VISION

In a nutshell, our goal for Rycca Italian wood coatings is to combine Italian elegance with cutting-edge technology to provide coatings that emphasize sustainability while enhancing the beauty of wood. We want to establish a new standard where each coating application reflects both tradition and contemporary through cooperation and creativity. Rycca coatings will stand for excellence and have a long-lasting effect on the environment and the craft of woodworking.

ABOUT US

Rycca Italian Wood Coatings embodies the perfect blend of Italian elegance and modern technology. Our coatings transcend conventional wood treatment, transforming it into art while prioritizing sustainability. Collaborating with artisans and embracing innovation, we're committed to leaving a lasting impact on woodworking and the environment. Welcome to the essence of Rycca.

RYCCA ITALIAN

In the field of Italian PU wood finishes, RYCCA is at the pinnacle of quality. These innovative and precisely made finishes elevate hardwood surfaces to the level of compelling works of art, transcending the commonplace. They do more than simply cover the wood; they give it enduring elegance and strengthened protection, guaranteeing that each piece becomes a monument to both beauty and toughness.

The commitment to conserving and improving the inherent charm of wood is at the heart of RYCCA's product offerings. Their Italian PU wood treatments work as a transforming agent, enhancing the grain and character of the wood while protecting it from the rigors of daily living. A durable layer prevents dings, stains, and the deteriorating effects of time, enabling the wood's real character to emerge unaltered.

RYCCA offers a variety of wood finishes, each appealing to different aesthetic sensibilities, in recognition of the diversity of tastes. Every option invites self-expression, whether it's the gleaming lustre of high gloss or the subtle elegance of matte. These coatings lend depth and character to each brushstroke, enhancing the individuality of the wood rather than just protecting it.

Polyurethane Italian Wood Coating (2 Pack)

The common of “polyurethane varnishes, paints and coatings” includes all the coatings products drying not only because of the solvent evaporation but mostly due to a chemical polyaddition reaction between 2 reagents (part A, containing the hydroxyl group, and part B containing the isocyanate group, the curing agent improperly defined as “catalyst”. These products are widely used, for exceptional chemical physical resistance, to achieve finishes with high surface hardness combined with excellent visual results. They are so flexible that can be used for assorted uses and sectors.

The range of polyurethane varnishes developed by ASTRA VERNICI includes a full series of transport and pigmented products , designed to meet any customer and application need:

Clear and pigmented base primers

Clear Opaque and pigmented top finishes

Clear and high gloss pigmented top finishes

Insulators for exotic timbers and melamine papers

ITALIAN SERIES	
POLYURETHANE FINISHES	HARDNER
PU CLEAR SEALER	6601
PU BLACK SEALER	6601
PU CLEAR MATT	6602
PU CLEAR SEMI MATT	6602
PU CLEAR DEAD MATT	6602
PU WHITE SEALER	6601
PU WHITE MATT	6605
PU MATT PIGMENTED (DARK SHADE)	6605
PU MATT PIGMENTED (LIGHT SHADE)	6605
PU CLEAR GLOSS	6610
PU WHITE GLOSS	6610
PU GLOSSY PIGMENTED (DARK SHADE)	6610

POLYURETHANE PIGMENTED COATINGS FOR INTERIOR APPLICATIONS

Similar to its Clear coating family, Polyurethane pigmented systems are highly versatile coatings suitable for almost all types of interior color applications. They offer excellent covering and finish along with high scratch resistance and favorable cost dynamics. Thanks to anti-yellowing properties.

SEALER

PRODUCT	CONSIDERATIONS
White Sealer	High solid, Excellent hiding power, Easy sanding
Black Sealer	High solid, Excellent hiding power, Fast drying and Easy sanding
Grey Sealer	High solid, Excellent hiding power, Fast drying and Easy sanding

TOP COAT FINISHES HAVING DIFFERENT MATTINESS

PRODUCT	CONSIDERATIONS
White Top Coat	High covering Excellent whiteness, Silky finish, Excellent Scratch resistance, Good Hardness.
Black Top Coat	High solids, Excellent hiding power, Silky finish, Excellent Scratch resistance.

TOP COAT CLEAR HIGH GLOSS

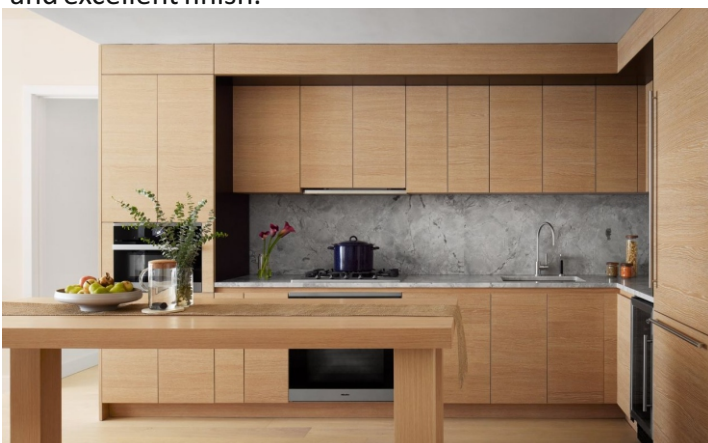

PRODUCT	CONSIDERATIONS
White Top Coat	High Gloss, High covering & Leveling, Excellent whiteness, Scratch resistance, Good Hardness, Price competitive.
Black Top Coat	High Gloss, High Covering & Leveling, Scratch resistance, Good Hardness.

Top Coat Finishes are also available for all colors in Rycca Color chart consisting of 1000 ready colors, RAL & NCS color charts. Furthermore Rycca Coatings can develop any color in any finish as per the customer needs and requirements.

ACRYLIC POLYURETHANE CLEAR COATINGS (HIGH CLARITY AND ANTI-YELLOWING)

Acrylic Polyurethane coatings are 100% anti-yellowing coatings with high clarity, excellent chemical resistance and excellent finish.

SEALER

Base	CONSIDERATIONS
White Primer	High Solid, Medium Drying, High clarity, Price Competitive.
Black Primer	High clarity, Fast Drying, Easy Sanding.

TOP COAT FINISHES HAVING DIFFERENT MATTINESS

PRODUCT	CONSIDERATIONS
White Top Coat	High Solid, Slow Drying and Curing, High scratch resistance.
Black Top Coat	Natural aspect, Rapid Drying and Curing, High scratch resistance.

ACRYLIC POLYURETHANE PIGMENTED COATINGS

Primer

PRODUCT	CONSIDERATIONS
White Primer	High Solid, Excellent hiding power, Easy sanding, Good adhesion on all type of wooden surface.
Black Primer	High solid , Excellent hiding power, Easy sanding, Good adhesion on all type of wooden surface.

MELAMINE

Melamine Coatings are the most commonly used products for Wood Coatings that are suitable for almost all type of interior surfaces except where yellowing is not permitted. They have wide possibilities of application processes and offer high covering, rapid drying and curing properties along with competitive pricing.

SEALER

BASE	CONSIDERATIONS
Clear Sealer	High Solid, Excellent transparency, Easy sanding, Competitive Price
Melamine Clear	High solid, Silky finish, Leveling, Excellent Scratch Resistance & Hardness

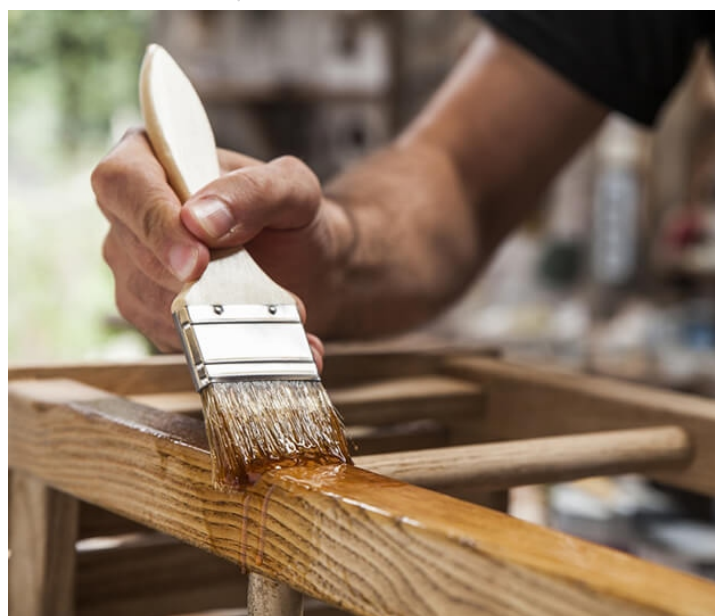

ISOLATORS

PRODUCT	CONSIDERATIONS
Base + Hardner	Sealer for Only & Greasy Woods or special cases of Polyestar applications

POLYESTERS

Polyesters are extremely hard coatings used for closed pores application where high thickness built-up is required. They come in 3 pack system consisting of Base, Accelerator and Hardener.

PRODUCT	CONSIDERATIONS
Clear high Gloss Polyester	High Clarity, Rapid Drying and 100 Gloss (GU)
White high Gloss Polyester	Rapid Drying and 100 Gloss (GU)
Black high Gloss Polyester	Rapid Drying and 100 Gloss (GU)

SPECIAL EFFECTS

Special effect products are designed to give highly decorative and aesthetic finish to the Wood.

METALLIC EFFECT

PRODUCT	CONSIDERATIONS
Silver	Fine / Medium / Large
Gold	Rich Gold - Fine & Medium / Old Gold
Bronze	Fine / Medium / Large
Brass	Fine / Medium / Large
Gold Mirror Effect	Gold Mirror Finish
Stainless Steel Effect	Stainless Steel Finish
Hammertone Effect	Hammered Metal Like Finish

CRACKLE EFFECT

Crackle effect gives fine pattern of dense "cracking" on the surface of the Wood.

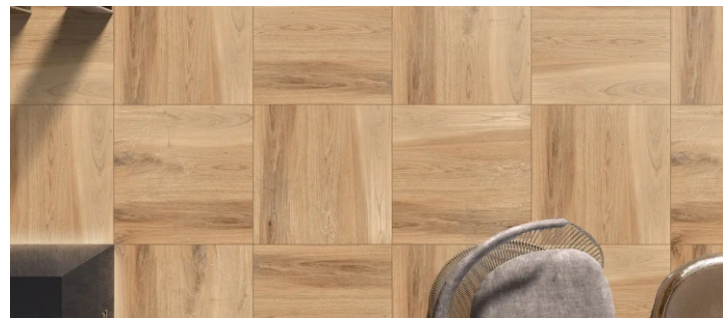

PRODUCT	CONSIDERATIONS
Crackle Effect	Crackle Base
Crackle Effect	Crackle Top Coat

As per specific customer requirements Crackle effect are available in Opaque and Transparent finish.

TILE EFFECT

These Types of finishes give Aesthetic tile like finish to the wood.

PRODUCT	CONSIDERATIONS
Granite Effect	Granite Like Finish
Marble Effect	Marble Like Finish

PEARL EFFECT

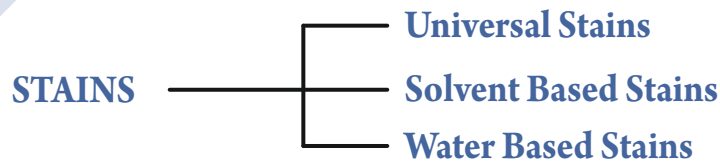

PRODUCT	CONSIDERATIONS
Mother of Pearl	Pearl
Translucent Pearl Effect	Translucent Finish
Colored Pearls	Pearls On Solid Colors

TEXTURE EFFECT

PRODUCT	CONSIDERATIONS
White	White Texture
Black	Black Texture

STAINS

Stains are used to give the wood a different color but with transparency which reveals structure of wood. The type of pigment used is important in order to achieve the right color and light resistance of stain.

1. Universal Stains

CHROMA STAINS (FOR DEEP NATURAL ASPECT)

Series chroma stains belong to the family of concentrated universal stains which can be diluted up to 9 times with solvents to give desired pore effects. Alternatively they can be diluted with water using specific carrier resin.

By using six base stains and mixing them together in specific ratio you can prepare of any color.

Basic Stains	Frequently Used Stains
Yellow	Oak
Orange	Walnut
Red	Wengue
Blue	Honey
Red Bordeaux	Cherry
Black	Dark Mahogany

2. SOLVENT BASED STAINS

PIGMENTED STAINS

Stains are family of pigmented stains for giving very rich pigmented tones to the wood or veneer. They are recommended to be diluted with 40M to get desired opacity.

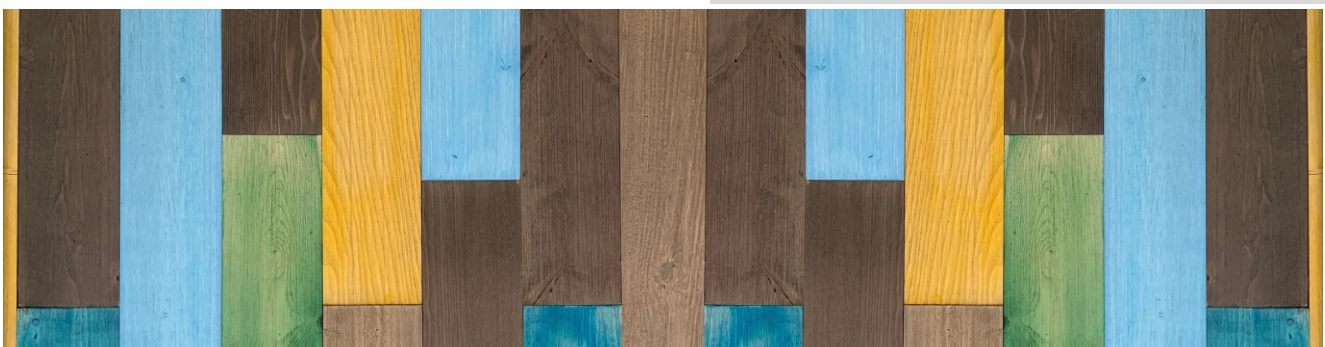

From given below six basic stains any type of tones can be developed depending on the color and finish.

Basic Stains
Yellow
Orange
Red
Blue
Red Bordeaux
Black

3. WATER BASED WOOD STAINED IMPREGNATING AGENTS

Series comes form the family of water based stains which work as Isolator while providing color to the wood and maintaining antifungal and anti bacterial properties. Using five base stained impregnating agents, any other stained impregnating agent can be developed to give different types of stain effects.

Basic Stains	Frequently Used Stains
Transparent	Chestnut
Yellow	Cherry
Blue	Mahognay
Orange	Pine
Red	Oak
Black	Dark Walnut
	Iroko
