ADDITIONAL PRODUCT

PRODUCT	AMOUNT
GST (18%)	15019
Transporation (4500)	4500
Total:	102960

(Rupees One Lakh Two Thousand Nine Hundred Sixty Only)

Optimized cutting sheet

Code :	1037			
Name :	25 Mm Two Track Frame			
	Optimization : 2 bar	Length : 4880 MM	Cutting tolerance : 5 MM	Rest : 1.33% 65 MM
Component Position			Cutting angle	Segment Length
	W2/W		/---45°-45°---\	1300 MM

Definitions

- Items (Aluminum&uPVC Profile, Glass, Hardware like locks, gasket etc.)
- Customers, Suppliers, Sales Staff
- Customer category, City, Country, State, Brand. Item group, Design group, Finishing Type
- Voucher Series, Item-sub-group, Profile Series, dependencies

Designs

- Unlimited typologies e.g. 2 Track 2 Shutter (2T2S), 3 Track 6 Shutters (3T6S),Outside openable
- Design Series & groups,design-wise labour charges
- Design definition - Formula,short-codes & parameter-based BOM,cutting angles & associate multiple images

Production*

- Optimisation based on actual measurement & from the available stock
- Production size tolerance. Blade thickness considerations
- Wastage & Scrap
- Transfer selective wastage to stock & remove remaining waste

Order

- Generate order (for extrusion, glass, hardware) Based on quotation, production or manual
- Print Order (with & without rates)

Reporting*

- Design sheet - with BOM, item images
- BOM, cost summary, quotation and item summary based on Quotation and/or based on Production
- Wall Charts
- Quotation status reports - open, WIP, close - across party, design, between dates (MIS)
- Site survey sheet
- Cutting optimization & layout sheet based on quotation & production - Normal and Graphical
- Stock ledger, Stock Status, Inward/Outward Register
- Reports & Filtered views can be exported to Excel, word, pdf.
- Material Consumption, label printing for items and finished windows

Stock Inventory*

- Maintain Stock of Profiles (quantity & length) & hardware
- Issue & return of profiles for finishing
- Waste stock, fresh stock

Integrated CRM

- Manage Leads and Enquiries
- Assign leads to team members, add notes, and track their status in real-time.
- Lead Progression and Workflow
- Follow-Ups and Reminders
- Automated reminders by Email

Quotation

- Make project quotation quickly & accurately. Maintain Versions & Status
- Quotation Calculations methods - Cost+, Total Cost, (Total Cost - Wastage)
- Design group, typology, finishing & Glass selection
- Generate BOQ/BOM.
- Facility to change Item/Item Group
- Calculate/Add Wastage % for Aluminum, Hardware, Glass
- Calculate Actual/Chargeable size of Glass based on Variance
- Additional costs (GST, Freight etc.) & Discounts
- Custom Terms & Conditions
- Super quick Optimisation Item-wise, Design-wise, Finish-wise. Options to add multiple standard lengths & custom lengths. Minimum Wastage

Other Features

- Rate update for profile, glass, hardware
- Printing Parameters and Defaults
- 1-D optimisation without design definition
- Multiple Quotation layouts Options
- Export/Import Design data with BOM & Formulas
- Multi-unit functionality - Inch, Dora & mm
- Custom water marking on select reports
- Windows/Doors Picture Making utility

***Disclaimer**: Some features listed in this brochure are part of our development roadmap,version-dependent, specially for ZAK-2024 and may not yet be available in the current version. These will be introduced soon in upcoming updates.*
