

HIGH SPEED CNC MACHINES

MACHINES MADE IN GERMANY

High Speed Family-
The Fast One

K15 Product Family-
The Powerful One

K20 Product Family-
The Versatile One

- Printing of up to 10 UV colours or 12 thermoplastic colours possible in one machine pass.
- Solid basic construction - suitable for glass, ceramics, plastic & metal articles.
- Tableware, Hollow ware, Beverage bottles, Cosmetic jars, Alcohol bottles.
- Part shapes: Round, Oval, Square, Flat & Parts with handles.
- Screen Printing (UV inks, High temperature ceramic inks), Digital Printing, Hot Foiling Extremely fast: up to 600 parts / minute.
- Single-Captured-Tooling for perfect printing results. Colour to colour register accuracy: +/- 0.1 mm.

Fully Automatic. Flexible. Configurable.

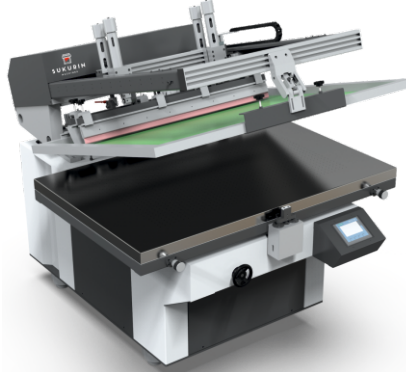

Bespoke Screen Printing Machines For Printing on Glass

Specialized automatic & semi-automatic screen printing machines
Designed to meet diverse printing needs with high precision and versatility

KEY FEATURES

- Servo controlled edge printing for high precision.
- Semi-automatic/automatic screen printing.
- Best for screen printing of logos, pictograms, graphics & uniform ink layer, fine lines.
- Versatile, stable, simple & easy to operate.
- Ideal for printing on plastics, glassware, electronic glass, medical & household goods glass panels.

Inks for Screen/Pad Printing on Glass

FARBAGLASS - HIGH-PERFORMANCE INKS

- Quick drying (5-10 minutes).
- High gloss & chemical resistance.
- Flexible & resilient on glass surfaces.
- Fade-resistant for outdoor durability.
- High opacity for strong colour coverage.

FARBAGLASS-UV - HIGH-GLOSS UV INK

- Compatible with LED & UV curing systems.
- Non-toxic & solvent-free.
- No post-heat treatment required.
- Durable for industrial screen printing.
- High-gloss, vibrant, & long-lasting finishes.

FARBAGLASS HT - HIGH-TEMPERATURE INK

- Withstand temperatures up to 1400°C.
- Dries within 5-10 minutes.
- Resistant to acids & alkalis for outdoor durability.
- Versatile for glass, ceramics & coated surfaces.
- Ideal for extreme durability & industrial applications.

FARBAGLASS NC - INK FOR TOUCH PANELS

- Non Conductive inks for touch panels.
- Compatible with mobile, tablet & laptop screens.
- Works on Gorilla, Xensation, Sodalime, & other glass types.
- High opacity with a silicone-free formulation.
- Maintains capacitive touch functionality.
- Available in variants for indoor (NC 900) & outdoor (NC 901) use.

FARBAFOIL - SOLVENT-BASED LACQUER FOR HOT STAMPING

- Ideal for pad & screen printing with sharp, raised effects.
- Enables smooth hot stamping for metallic finishes.
- Scratch-resistant for lasting brilliance.
- Initial curing at 60°C, final curing at 120°C.
- Perfect for luxury packaging & decorative glassware
