About Us

Qutone is a globally recognized surface solutions brand, trusted for its continuous innovation, premium quality, and design excellence. With cutting-edge technology and eco-conscious manufacturing, Qutone redefines living and architectural spaces, delivering products that stand for performance and elegance.

Introducing iClad

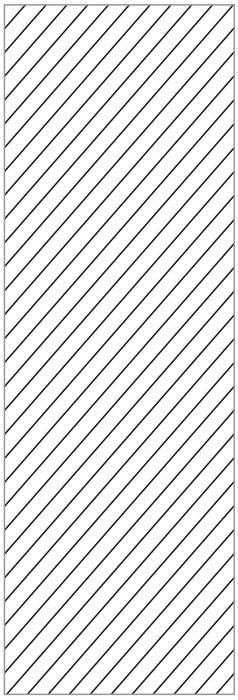

Founded in 2024, iCLAD is redefining modern facades through innovation, advanced technology, and design excellence. With refined finishes and a rear ventilated facade approach, iCLAD creates sustainable facade solutions that enhance both aesthetics and building performance.

What is Sintered Stone? *Redefining Material Science*

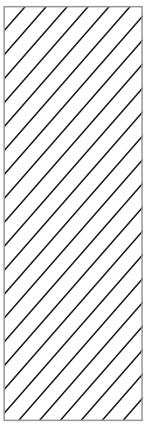

iClad panels are made from Sintered Stone — a next-generation surface formed by compressing 100% natural materials at over 40,000 tons of pressure and firing them at 1200°C. This results in extremely dense, non-porous panels that are fireproof, UV-resistant, stain-proof, and incredibly strong. With advanced surface finishes and **Puretech** coating, iClad stands apart in the world of façades.

3000 mm x 1000 mm

1800 mm x 600 mm

iCLAD SINTERED STONE COMES IN TWO UNIQUE SIZES OF

iCLAD sintered stone panels are available in two versatile sizes, 3000 mm x 1000 mm and 1800 mm x 600 mm, catering to a broad range of design requirements. These dimensions allow architects and designers to select the ideal size for their specific projects, ensuring seamless integration and adaptability to various architectural contexts.

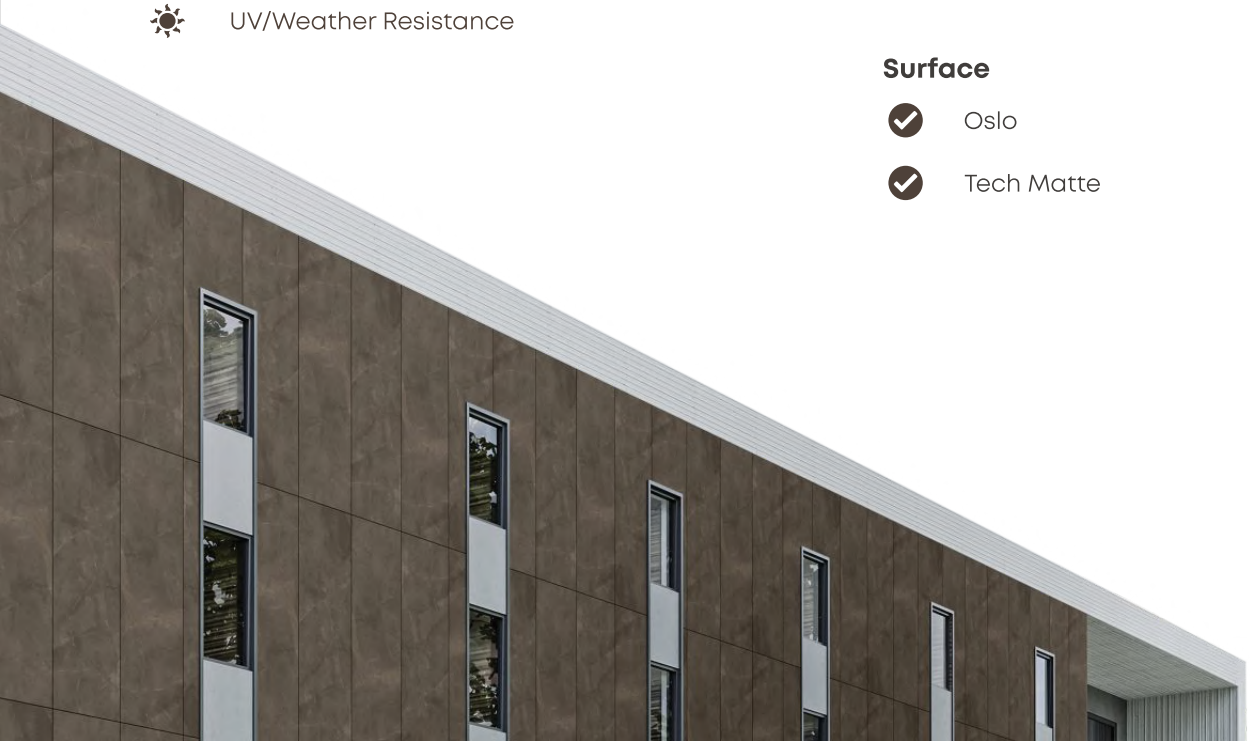

The larger 3000 mm x 1000 mm panels are perfect for expansive surfaces, providing a sleek, continuous look, while the 1800 mm x 600 mm panels offer greater flexibility for smaller or intricate designs. Both sizes maintain the exceptional durability, weather resistance, and aesthetic appeal that define ICLAD's superior façade cladding solutions.

Why Choose iClad Panels?

- Resistant to Heat and High Temperatures
- Suitable for Indoor and Outdoor Applications
- Resistant to Mould and Fungi
- Resistant to Thermal Shock
- Eco-friendly and Recyclable
- UV/Weather Resistance
- Dimensional Stability
- Hygienic Surface
- Impervious Surface
- Resistant to Humidity
- Deflection Resistance

PROFILE SYSTEMS FOR SEAMLESS INSTALLATION

VISIBLE CLIP SYSTEM

The iClad visible clip system delivers a perfect blend of affordability and functionality for your facade project These pre-engineered clips ensure a rapid and cost-effective installation process. The interlocking clips securely hold the iClad panels in place, creating a distinctive aesthetic with the exposed clip accents becoming a design element.

CONCEALED CLIP SYSTEM

The iClad concealed clip system elevates your architectural vision with a flawless, uninterrupted aesthetic. These meticulously designed clips ensure secure and invisible fastening system, allowing the beauty of panels to take center stage.

Puretech Technology

All iClad panels are powered by Puretech - photocatalytic coating ensures self-cleaning & better air quality – an advanced surface technology that actively breaks down pollutants and eliminates bacteria. This innovation ensures your façades remain not only beautiful but also clean, hygienic, and sustainable.
