About Us

AAGYA INDUSTRY CO., LTD.
Engineering Excellence, Elevating Quality—For Over Two Decades

In an industry where precision defines performance, AAGYA INDUSTRY CO., LTD. has spent more than 20 years redefining what it means to manufacture excellence. Headquartered in China and serving markets across every continent, we are a globally recognized manufacturer of pattern glass, mirrors, and processed glass. But our story is not simply one of production capacity or geographic reach. It is a story of quality—specifically, of quality that deepens, refines, and evolves over time.

When AAGYA first began operations, quality meant consistency. It meant producing glass that met specification, batch after batch, without variation. It meant building trust with early partners who relied on us to deliver. But from the outset, leadership viewed quality not as a static target, but as a dynamic discipline—one that would demand increasing rigor as markets grew more competitive and customer expectations more sophisticated.

Over two decades, that philosophy has shaped every aspect of our business. Quality at AAGYA is cumulative. Each year brings refined processes, advanced inspection protocols, deeper technical expertise, and a culture of continuous improvement embedded across every department. Our investment in cutting-edge technology ensures that our production methods keep pace with—and often anticipate—the demands of global markets. Our first-rate inspection facilities operate at the most stringent tolerances, catching deviations before they leave the floor. Our scientific management techniques align teams around shared standards, ensuring that excellence is not left to individual effort, but systematically built into every process.

This commitment extends beyond manufacturing. Our experienced business staff works closely with clients to understand application-specific requirements, turning what might be a standard product into a purpose-engineered solution. Our design concepts balance innovation with practicality, ensuring that aesthetic appeal never comes at the expense of structural integrity. And our first-rate service ensures that quality is not confined to the product itself, but reflected in every interaction—from initial inquiry to after-sales support.

The result is a track record defined not by isolated achievements, but by sustained performance. AAGYA has earned the trust of a broad and diverse client base, both locally and globally, because partners know what to expect: glass that meets the highest quality standards, delivered consistently, year after year. Our brand has become synonymous with reliability, and our relationships are built not on transactional convenience, but on demonstrated capability and mutual respect.

Yet for all we have accomplished, our vision remains forward-looking. We measure success not only in output or market share, but in the quiet confidence of clients who rely on AAGYA when precision matters most. Every new order is an opportunity to refine, to improve, to set a higher benchmark. Our business vision focuses on getting advantages through innovation, instilling character through integrity, aiming for perfection in execution, and consistently taking the lead through quality that speaks for itself.

In an era when many manufacturers prioritize speed or cost above all else, AAGYA has chosen a different path—one that values depth over haste, refinement over volume, and long-term trust over short-term gain. We manufacture pattern glass, mirrors, and processed glass, yes. But more importantly, we manufacture confidence. We manufacture consistency. We manufacture quality that does not degrade with time, but improves because of it.

After more than 20 years, that commitment remains our most valuable asset—and our clearest direction forward. At AAGYA, quality is not a milestone to be reached and then maintained. It is a direction, pursued with purpose, every single day. And as we look to the future, we do so with the same conviction that guided us from the beginning: that excellence is not achieved once, but earned, refined, and renewed, year after year.

The Elegance and Versatility of PATTERN GLASS: A Timeless Architectural Marvel

Figured glass, also known as patterned glass, is a stunning and versatile material that adds a touch of elegance and sophistication to any space. Its unique textures and intricate patterns create a visual feast, transforming ordinary glass into a work of art.

Figured glass is a versatile and functional material that adds both aesthetic and practical benefits to any space. Its ability to provide privacy, diffuse light, and enhance the overall design makes it a popular choice in modern architecture and interior design.

PRODUCT FEATURES

Aesthetic Appeal: The intricate patterns and textures of figured glass add a decorative touch, enhancing the overall ambiance of a room. Whether used in doors, windows, or partitions, it brings a sense of luxury and refinement.

Privacy and Light Diffusion: The patterns and textures help obscure visibility while allowing natural light to filter through, making it ideal for areas requiring privacy without compromising on brightness.

Versatility: Figured glass is used in a wide range of applications, from architectural elements like windows and doors to interior design features such as partitions, shower enclosures, and furniture.

Durability: Certain types of figured glass are designed to be more resistant to shattering, providing added safety and security in public buildings, schools, and commercial establishments.

Sound Insulation: Some variants of figured glass offer sound insulation benefits, reducing external noise levels and creating a quieter indoor environment.

BENEFITS

Light Diffusion: Allows natural light to filter through while reducing glare and harsh shadows, creating a pleasant and well-lit environment.

Safety Features: Can be toughened or laminated to meet safety standards, providing added security in public and commercial spaces.

Energy Efficiency: Helps improve energy efficiency by reducing heat gain and minimizing cooling costs, especially when combined with insulated glass units (IGUs).

Easy Maintenance: The smooth surface of figured glass makes it easy to clean and maintain, ensuring it remains in pristine condition.

PRODUCT SPECIFICATION

Thickness
Available in various thicknesses: 3mm, 4mm, 5mm, and 6mm, 8mm,10mm
Customizable thickness options to meet specific project requirements.

Color
Normal Clear , Ultra Clear(Low Iron), Grey, Bronze, Blue, Green

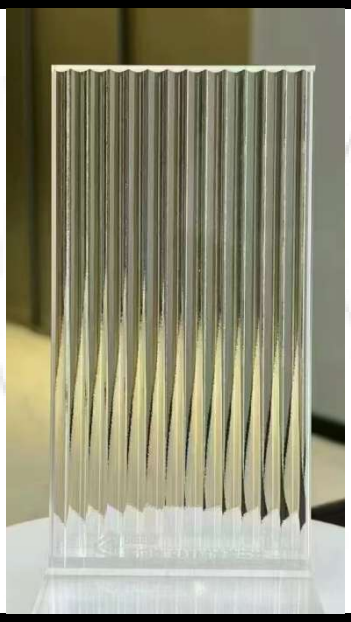

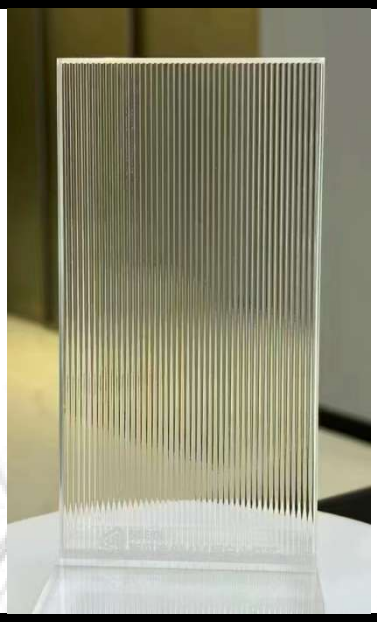

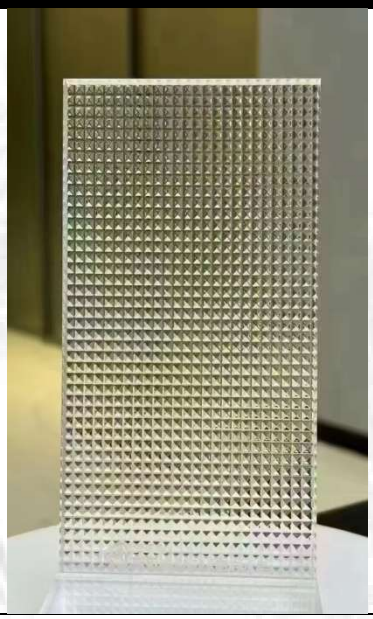

Dimensions
Standard sizes: 1840mm x 2440mm, 2440*2000, 2440*2100, 2800*2100, 3000*2100, 3300*2100, 3660*2100
Custom dimensions available upon request to fit unique applications.

Surface Quality
Smooth and flat surface achieved through the rolling process. Free from distortions and imperfections, providing high-quality optical clarity.

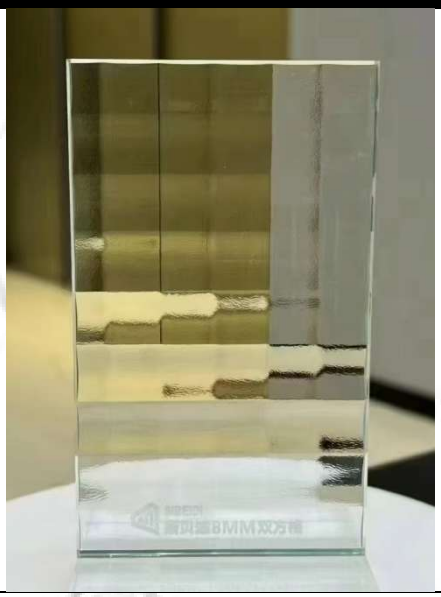

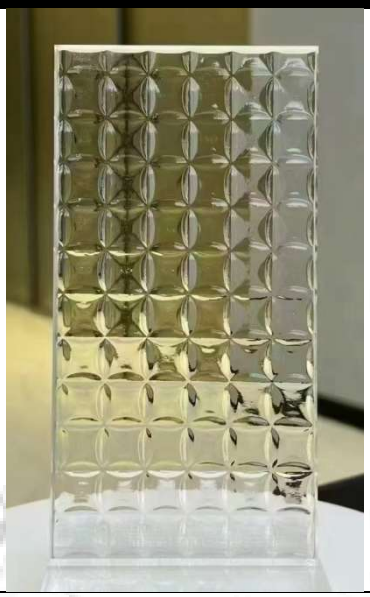

Durability
Resistant to scratches and environmental factors, ensuring long-lasting performance.

PATTERN GLASS – MORU

Patterned glass is roller with the patterns of sculpture, and then roll in the glass surface by double-sided printing or single-side patterns with the translucent ornamental flat glass. Tactile patterns is the combination of lens and prism, can light refraction, reflection and diffusion in a different direction. After patterned glass light reflection, refraction, become quite disorder, unable to image, so it cannot stop things.

Characters：
Colourful designs, sometimes obscured peaceful,sometimes simple and elegant, sometimes bold and unrestrained.

Decorative pattern with strong stereoscopic with non-fading,that can meet more requirement of decoration.

Thickness and size：
Thickness: 4-10mm
Size: 1500*2000mm, 1830*2134mm, 1830*2440mm, 2000*2440, 2100*2440, 2000*2500mm.

Extra Clear and Normal Clear
Tinted Colors : Grey, Bronze, Blue, Ford Blue.
Coated Colors: Gold, Silver, Pink, Euro Bronze, Violet.

Application：
Normal clear patterned glass is mainly used in public and private facilities such as:office,meeting room,hotel,hospital,stadium,gymnasium,bathroom and so on.

It's widely used shuttered window,furniture table,household electrical appliances and light material.)

Decorative Silk Print Glass:
A Symphony of Art and Function

Decorative silk print glass , also known as silk-screened glass, is a type of decorative glass that combines artistic design with practicality. This glass undergoes a specialized process where ceramic frit ink is printed onto the surface using a silk screen, then fused permanently through a tempering process. This results in a durable, vibrant design that is both beautiful and functional.

Decorative silk print glass is a versatile and elegant solution for modern interiors and exteriors, offering both style and functionality. Its unique combination of vibrant designs, durability, and customizability makes it a popular choice for a wide range of applications in residential, commercial, and public settings.

PRODUCT FEATURES

Vibrant Designs: Silk print glass offers a wide range of patterns and designs, from intricate motifs to bold geometric shapes. The use of ceramic frit ink ensures that the colors remain vivid and do not fade over time.

Durability: The tempering process enhances the strength and durability of the glass, making it resistant to scratches, impacts, and environmental factors. This makes it suitable for both indoor and outdoor applications.

UV Resistance: The ceramic ink used in silk print glass is UV resistant, ensuring that the printed designs do not degrade or fade when exposed to sunlight.

Customizability: Decorative silk print glass can be customized to meet specific design requirements, including custom colors, patterns, and textures. This allows for unique and personalized applications.

Safety: The tempering process also makes silk print glass safer to use, as it breaks into small, less harmful pieces if shattered.

PRODUCT SPECIFICATION

Thickness
Available in various thicknesses: 3mm, 4mm, 5mm, and 6mm, 8mm,10mm
Customizable thickness options to meet specific project requirements.

Color
Normal Clear , Ultra Clear(Low Iron), Grey, Bronze, Blue, Green

Dimensions
Standard sizes: 1840mm x 2440mm, 2440*2000, 2440*2100, 2800*2100, 3000*2100, 3300*2100, 3660*2100

APPLICATION

1. Interior Design :
   - Wall Panels : Enhances the visual appeal of interior spaces with vibrant and artistic wall panels.
   - Partitions : Provides privacy and a decorative element in open-plan offices and homes.
   - Doors : Adds elegance and uniqueness to interior and exterior doors.

   2. Balustrades and Railings :
   - Staircases : Adds safety and a decorative touch to staircase railings.
   - Balconies : Enhances the visual appeal of balcony railings while providing protection.

3. Furniture :
- Tabletops : Ideal for tabletops, adding a contemporary and artistic touch.
- Cabinet Doors : Enhances the design of cabinet doors in kitchens, bathrooms, and living rooms.

4. Signage :
- Architectural Signage : Used for creating eye-catching and durable signs for commercial buildings and public spaces.
- Branding : Customizable designs to incorporate logos and branding elements.

5. Skylights and Canopies :
- UV Protection : Adds a decorative element to skylights and canopies while providing UV protection.
- Diffused Light : Ensures diffused light penetration, enhancing the ambiance of the space.

6. Retail Displays :
- Store Interiors : Creates stylish and engaging displays for products in retail environments.
- Window Displays : Attracts customers with vibrant and attractive window displays.

7. Office Partitions :
- Privacy : Provides privacy while adding a decorative element to office interiors.
- Custom Designs : Customizable designs to match corporate branding and interior design themes

RANGE OF COLORS & DESIGN

1. Geometric Patterns :
- Simple Geometric Shapes : Circles, squares, triangles, and rectangles.
- Complex Geometric Designs : Interlocking shapes, tessellations, and abstract geometric patterns.
- Lines and Stripes : Horizontal, vertical, diagonal, and zigzag patterns.

2. Floral and Nature Motifs :
- Botanical Illustrations : Leaves, flowers, vines, and tree branches.
- Nature-Inspired Scenes : Landscapes, trees, and natural elements.

3. Abstract and Artistic Designs :
- Abstract Art : Freeform shapes, swirls, and modern art-inspired designs.
- Textured Patterns : Simulated textures such as waves, brush strokes, and splatters.

4. Cultural and Traditional Patterns :
- Ethnic Motifs : Designs inspired by various cultures, including tribal patterns and traditional motifs.
- Classic Patterns : Damask, paisley, and filigree designs.

5. Text and Typography :
- Quotes and Phrases : Inspirational quotes, sayings, and words.
- Numbers and Letters : Alphanumeric patterns and typographic art.

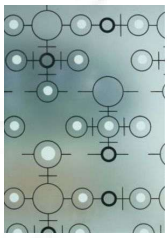

6. Custom Designs :
- Brand Logos and Graphics : Custom designs featuring corporate logos and branding elements.
- Personalized Patterns : Unique designs tailored to specific projects or client preferences.

Color and Finish Options:

- Monochrome Designs : Single-color prints in various shades and tones.
- Multi-Color Designs : Vibrant multi-color prints that add depth and visual interest.
- Matte and Gloss Finishes : Options for matte or glossy finishes to achieve the desired look.

Titanium Frosted Glass:
A Blend of Elegance and Durability

Titanium frosted glass , also known as titanium ice flower glass, is a type of decorative glass that combines the beauty of frosted design with the strength and durability of titanium. This glass undergoes a specialized acid etching process, creating a unique and intricate pattern that diffuses light while maintaining privacy.

Titanium frosted glass is a versatile and elegant solution for modern interiors, offering both style and functionality. Its unique combination of privacy, light diffusion, and artistic design makes it a popular choice for a wide range of applications in residential and commercial settings.

Titanium frosted glass offers a unique combination of artistic design and practical functionality, making it a popular choice for a wide range of applications in residential and commercial settings.

PRODUCT FEATURES

Translucent Surface : The frosted finish allows light to pass through while diffusing it, creating a soft and elegant glow. This feature provides privacy without sacrificing natural light.

Titanium Coating : The glass is coated with a titanium layer, enhancing its durability and resistance to scratches and wear.

Intricate Patterns : Available in a variety of intricate patterns, including ice flower designs, geometric shapes, and abstract motifs. These designs add a touch of sophistication to any space.

Durability : The titanium coating makes the glass highly durable and resistant to scratches, ensuring long-lasting beauty and performance.

Versatility : Suitable for a wide range of applications, including interior doors, partitions, shower enclosures, wall cladding, furniture, and decorative panels

Enhanced Privacy : Titanium frosted glass provides excellent privacy while allowing natural light to filter through, making it ideal for bathrooms, offices, and other spaces requiring seclusion.

Aesthetic Appeal : The elegant and modern look of titanium frosted glass enhances the overall design of any space, adding a touch of sophistication and style.

Light Diffusion : The frosted surface diffuses light, creating a soft and pleasant ambiance. This feature reduces glare and improves visual comfort in interior spaces.

Customization : Can be tailored to meet specific design requirements, with various patterns, textures, and levels of opacity available.

Environmental Considerations : Produced using eco-friendly materials and processes, titanium frosted glass supports sustainable design practices and contributes to green building certifications.

PRODUCT SPECIFICATION

Thickness
Available in various thicknesses: 3mm, 3.5mm, 3.8mm, 4mm, 4.5mm, 4.8mm, 5mm, and 6mm, 8mm,10mm
Customizable thickness options to meet specific project requirements.

Color
Normal Clear , Ultra Clear(Low Iron), Grey, Bronze, Blue, Green

Dimensions
Standard sizes: 1840mm x 2440mm, 2440*2000, 2440*2100, 2800*2100, 3000*2100, 3300*2100, 3660*2100
Custom dimensions available upon request to fit unique applications.

Surface Quality
Smooth and flat surface achieved through the rolling process. Free from distortions and imperfections, providing high-quality optical clarity.

Durability
Resistant to scratches and environmental factors, ensuring long-lasting performance.

Titanium frosted glass can be produced in a variety of subtle, muted shades to match different design preferences. Here's a detailed look at the color options typically available:

Range of Colors
GOLD, SILVER, PINK Titanium Coating combined with the below details

1. Clear Frost : The classic frosted finish with a neutral, translucent appearance.
2. White Frost : A bright and clean look that enhances the light diffusion effect.
3. Gray Frost : A sophisticated and elegant option that adds a touch of modernity.
4. Bronze Frost : A warm and inviting hue that complements various design styles.
5. Blue Frost : A calming and serene shade perfect for creating a tranquil atmosphere.
6. Green Frost : A fresh and lively option that brings a touch of nature indoors.
7. Pink Frost : A soft and subtle color that adds a hint of warmth and charm.

These colors can be customized to different levels of opacity and patterns to suit specific design requirements. Titanium frosted glass offers both aesthetic appeal and functional benefits, making it a versatile choice for various applications.

APPLICATION

1. Interior Design :
   - Wall Panels : Enhances the visual appeal of interior spaces with vibrant and artistic wall panels.
   - Partitions : Provides privacy and a decorative element in open-plan offices and homes.
   - Doors : Adds elegance and uniqueness to interior and exterior doors.

   2. Balustrades and Railings :
   - Staircases : Adds safety and a decorative touch to staircase railings.
   - Balconies : Enhances the visual appeal of balcony railings while providing protection.

   3. Furniture :
   - Tabletops : Ideal for tabletops, adding a contemporary and artistic touch.
   - Cabinet Doors : Enhances the design of cabinet doors in kitchens, bathrooms, and living rooms.

   4. Signage :
   - Architectural Signage : Used for creating eye-catching and durable signs for commercial buildings and public spaces.
   - Branding : Customizable designs to incorporate logos and branding elements.

   5. Skylights and Canopies :
   - UV Protection : Adds a decorative element to skylights and canopies while providing UV protection.
   - Diffused Light : Ensures diffused light penetration, enhancing the ambiance of the space.

6. Retail Displays :
- Store Interiors : Creates stylish and engaging displays for products in retail environments.
- Window Displays : Attracts customers with vibrant and attractive window displays.

7. Office Partitions :
- Privacy : Provides privacy while adding a decorative element to office interiors.
- Custom Designs : Customizable designs to match corporate branding and interior design themes

RANGE OF COLORS & DESIGN

1. Geometric Patterns :
- Simple Geometric Shapes : Circles, squares, triangles, and rectangles.

MIRRORS

The AAGYA Mirror Range is a collection of high specification mirrors that has incorporate excellent protection of the reflective silver layer or Aluminum Layer, without the need for the copper and lead used in the conventional process. In addition to being environmentally friendly to manufacture, the AAGYA Mirror Range offers far greater resistance to natural atmospheric corrosion – thus reducing the unsightly problems of black edges and spot faults.

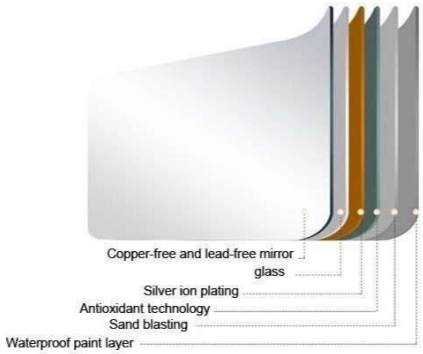

All products can be utilized across a wide variety of buildings and applications including walls, partitions, doors, displays, ceilings, cupboards, wardrobes and other furniture.

Depending on Customer requirement we can offer mirrors both CLEAR MIRRORS and ULTRA CLEAR MIRRORS in all the specification as needed

- Silver Mirrors
- Copper & Lead Free Mirrors
- Alumunium Mirrors
- Safety Mirrors

Aluminum is a popular choice for mirror coatings because of its reflectance. With the highest reflectance of any metal in the ultraviolet and infrared spectral ranges, aluminum only falls behind silver in the visible light and near-infrared ranges. Bare aluminum can be used in optical mirrors for telescopes in space to achieve larger bandwidths of light. Unfortunately, the natural creation of aluminum oxide can reduce the reflectiveness of the aluminum coating. To counteract this, additional protective coatings can be applied over the aluminum.

A natural barrier oxide layer can form over aluminum mirrors, protecting it from further corrosion. Unfortunately, this barrier is not easy to clean and can be altered based upon other environmental factors. Because of this unreliability, protective coatings are often placed over the bare aluminum. This usually involves a dielectric coating that successfully protects the surface from damage. However, this could potentially reduce the reflectance of the aluminum. An atomic layer deposition technique or another deposition method could potentially improve protection while limitedly effecting mirror reflectance.

Though the presence of oxygen may cause aluminum to corrode, even if the aluminum does have an additional protective coating, there is hope that future optical mirrors used in an astronomic application could be positioned far enough from the Earth not to be impacted by these environmental factors. In this case, mirrors with protected aluminum coatings may be well-preserved and function without issue for long periods of time.

AAGYA Aluminum Mirror is produced through Horizontal Productionline, which is the most advanced production equipment for coating aluminum, so our aluminum mirror is best quality, that's suitable for any kind of processed and edgework., such as: Decorative Furniture Mirror, Art Mirror, Bathroom Mirror, Beveled Mirror and other Processed Mirror etc. Quality Aluminum Mirror is usually coated by two layers of paints. We can offer both Single Coating and also Double Coating as per customer requirement.

Our Aluminum Tinted Mirror, Silver Mirror, Lead Free Mirrors can be produced in Clear as well as Colored Mirror with various color like Gray, Bronze, Green, Blue, which is produced by vacuum coating a layer of aluminum on the tinted glass which produces different and nice decorating effect.

青岛阿吉娅工贸有限公司
QINGDAO AAGYA INDUSTRY CO., LTD

AAGYA

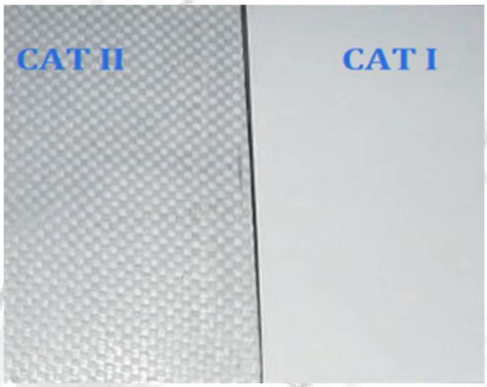

CLEAR
Choose Clear for stunning clarity and to maximize the natural light bouncing around the room

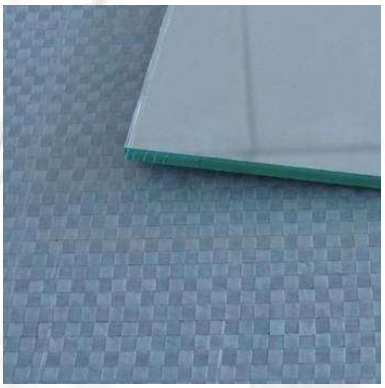

GREY
Choose Clear for understated yet elegant look that sets your space apart from the rest.

BLACK
Dark & Elegant, Black Mirrors are the height of luxury, ideal for decorative appliances.

BRONZE
Choose Bronze for a golden hue that can be used as a feature in modern styling.

*All colors are for reference only.. it will vary a little with different batch of productions. Tinted Mirrors depend on the Colors of the tinted color and will vary as per the color from different manufacturers of glass.

AAGYA Safety Mirror is produced by attaching an adhesive protective plastic film on the back of mirror. It can prevent people from being hurt while mirror is breaking (broken) by accident. Almost all safety mirrors are produced with silver mirror. For an alternative, it also can be made of aluminum mirror. Vinyl backed safety mirror is used to add dimension and light to your space with added safety benefits. The smooth vinyl film on the back of the mirror acts as a protective film, and if the mirror is cracked it stays together stuck to the film.

Applications Indoor use only
Sliding doors, Wardrobes, Mirror cabinets, Furniture, Fitness club, Gym, or other public areas
Any places where you use common silver mirror, you can also use safety mirror.

SPECIFICATION:

Sheet Aluminum Mirrors:
Thickness: 1mm ~ 2.7mm
Float Mirrors: 1.8mm ~ 8mm

Regular Sizes: 500*700, 600*900, 1000*700, 1000*800, 1220*900, 1220*914, 1220*1000, 1830*1220, 2440*1830, 3300*2140, 3660*2140 to the maximum 3660*2440.

We can do according to customer requirements for the back color and single and double coating of the layers of the Paints while processing Mirrors if they
can meet our MOQ (Minimum Order Quantity)
