

WINDOWMAKER SOFTWARE

The world's leading software for the window and door industry

ABOUT US

43+ YEARS OF EXPERIENCE

Windowmaker is an established software company with over 43+ years of experience in the window and door industry. 11,000+ licences supplied worldwide, we strive to continuously innovate, deliver robust, reliable and flexible software solutions.

40+ DEVELOPERS

Our dedicated team of experts ensures we have a continuous program of development, testing and support. This enables us to respond quickly to the needs of our customers as well as changes in upcoming market trends.

75+ COUNTRIES

We have sold to over 4,000 businesses within the window and door industry across the globe. Our single, highly adaptable solution is scalable to businesses - large and small.

700+ MAN-YEARS OF R&D

These efforts and investments have helped us to evolve into one of the most comprehensive window and door software solutions available. Despite the wide range of features, Windowmaker remains extremely easy to use with an intuitive user interface and simplified reporting systems.

THE WINDOWMAKER PRODUCT RANGE

Power your business with Windowmaker - the end-to-end platform, supporting you from sales through manufacturing, delivery, installation, and service, with flexible, cost-effective plans to fit your business.

- ✓ Bays / Bows / Georgian / Leaded
- ✓ Entrance Doors / Panels
- ✓ Global Changes
- ✓ Revisions
- ✓ Standard Reports/ Dashboards

Essentials

Includes:

- ✓ **All the Features of Sales**
- ✓ Purchase Order Reports
- ✓ Production Work Instructions
- ✓ Bar Optimisation
- ✓ Reusable Offcuts
- ✓ Labels
- ✓ Delivery Reports
- ✓ Installation Instructions

Professional

Includes:

- ✓ **All the Features of Essentials**
- ✓ Windload
- ✓ Commercial Contracts
- ✓ Optimised Costing / Pricing
- ✓ Purchase & Sub-batching
- ✓ Production Scheduling
- ✓ Remakes
- ✓ Deliveries & Scheduling
- ✓ Installation Scheduling

Cloud-Based Security

Cost-Effective

Customisable Solutions

ADVANCED CONFIGURATOR

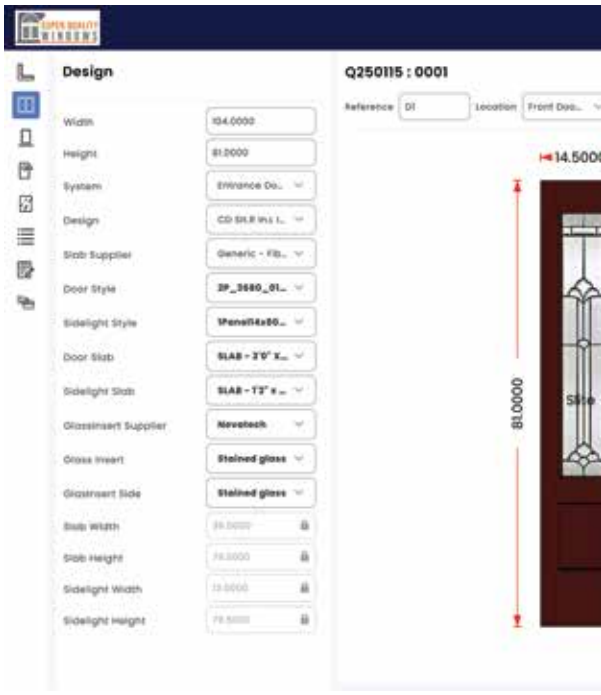

- A single software solution for all materials - PVC-U, Aluminium, Wood, Fibreglass, Steel, Composite
- Intuitive and quick - Increase efficiency and throughput
- Intelligent Order Entry to eliminate any invalid input with associated costly mistakes

Shapes

Design-customised options list to change the specification or add extras

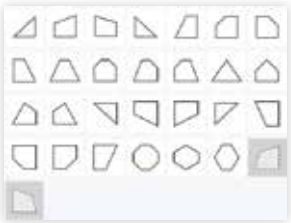

Glazing

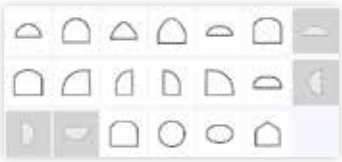

Bays & Bows

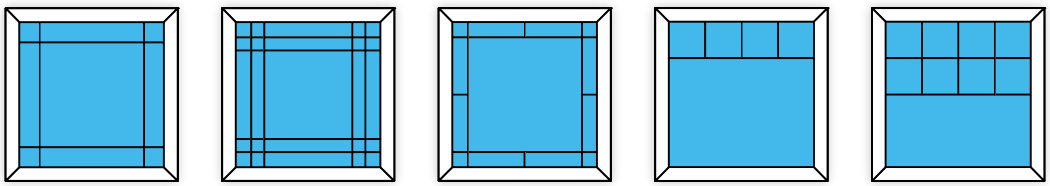

Angled

Arched

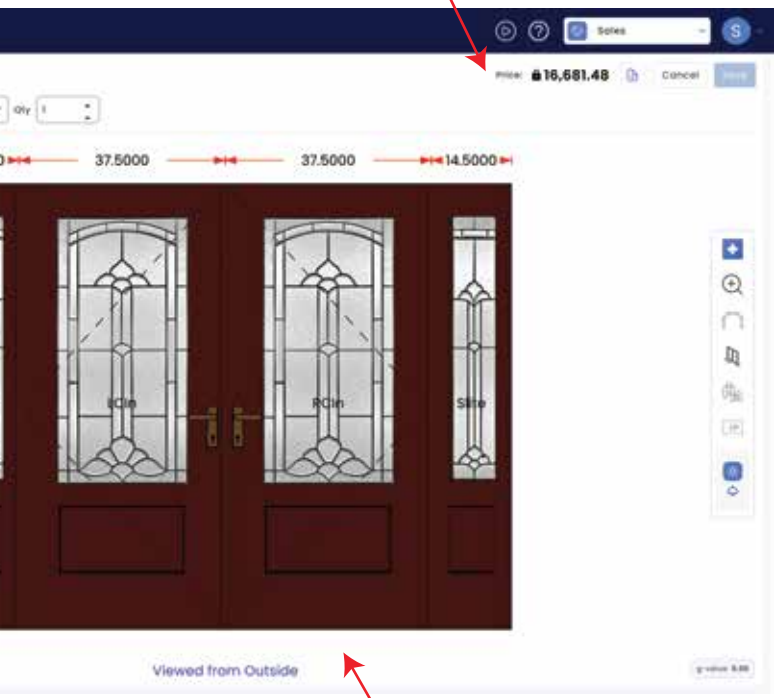

Quick application of simple or complex Georgian/ Colonial Grids including Sunburst

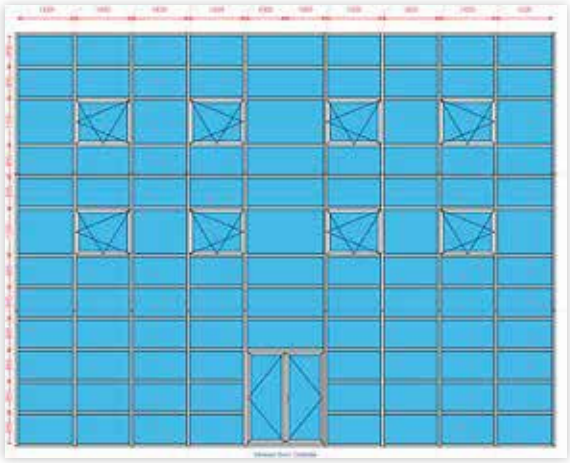

Unrivalled rules-based Architecture for flexibility and total control

▶ Angled and Arched Shapes	▶ Georgian & Leaded	▶ Standard Products
▶ Bays & Bows	▶ Entrance Doors	▶ Commercial Projects
▶ Curtain Walling	▶ Conservatories	

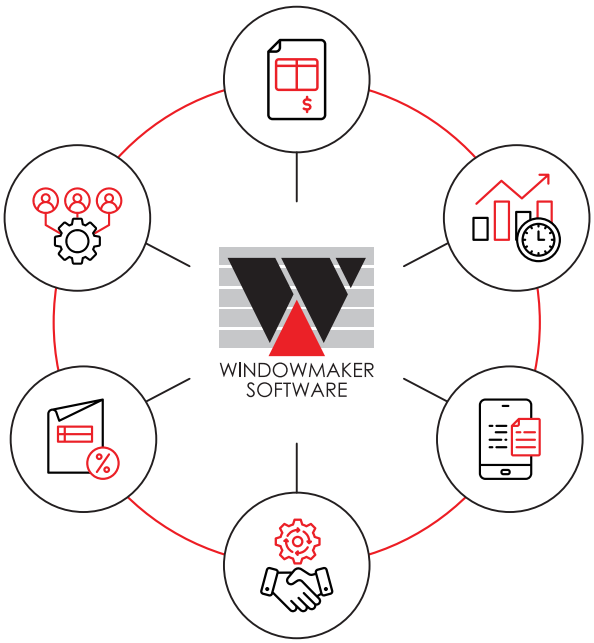

SALES

Sales - Trade

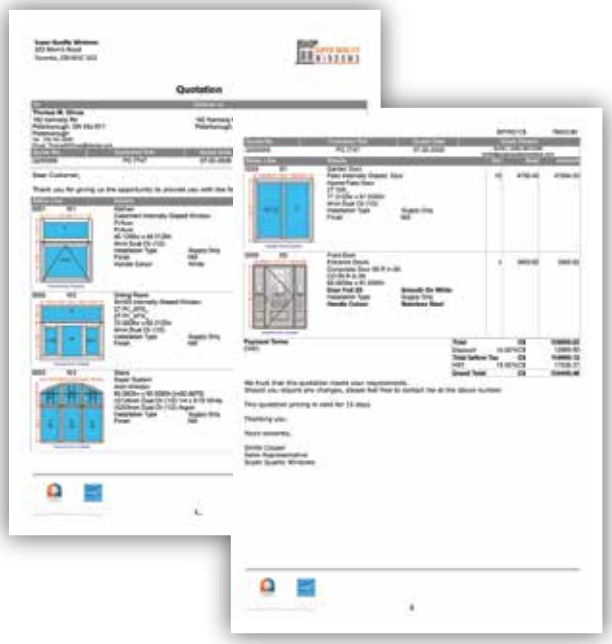

Windowmaker Dealer Client

A dedicated sales solution for dealers. Provide Windowmaker Dealer Client to your network of dealers for efficient quoting, ordering and a completely integrated sales experience.

Dealer Benefits

- Fast, professional quotes
- Always up-to-date
- No paperwork
- Mobile & offline access
- Order tracking
- Fewer errors, more sales

Manufacturer Benefits

- Unified system = low effort
- No manual order entry
- Real-time dealer visibility
- Smarter pricing & planning
- No paper price lists
- Happy, easy-to-train dealers

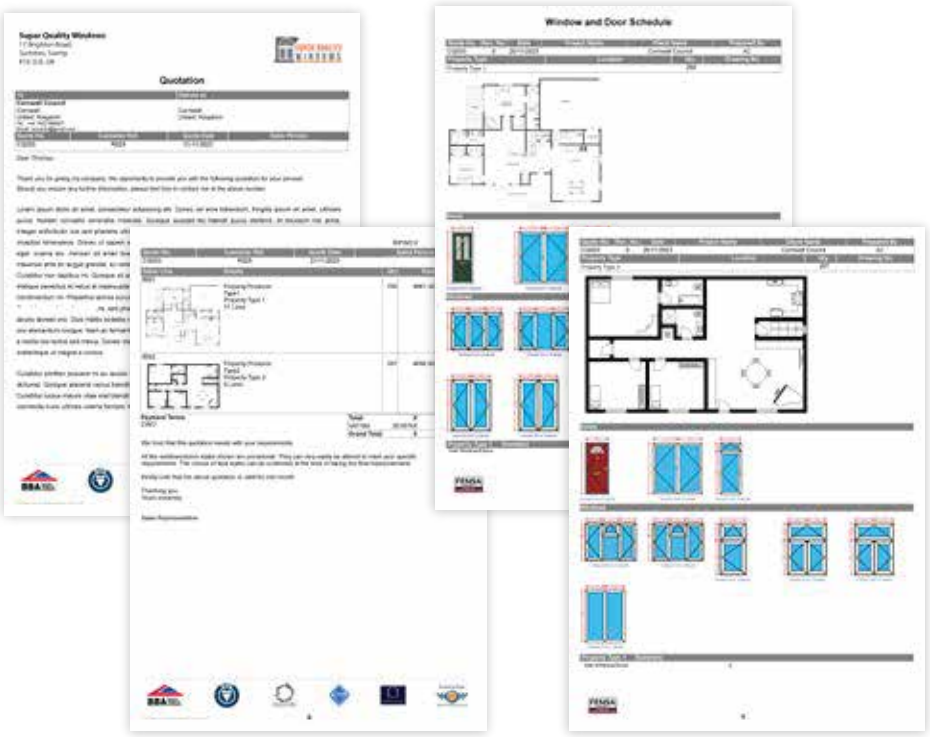

Windowmaker Options

▶ Pricing via Marked-up Cost	▶ Customer Special Terms	▶ Commercial Projects
▶ Optimised Costing	▶ Global Changes	▶ Link to CAD
▶ Pricing Extras	▶ Revisions	

Maximise profits with Error-free quotations and Reduced turn-around time

Sales - Commercial

Commercial Projects

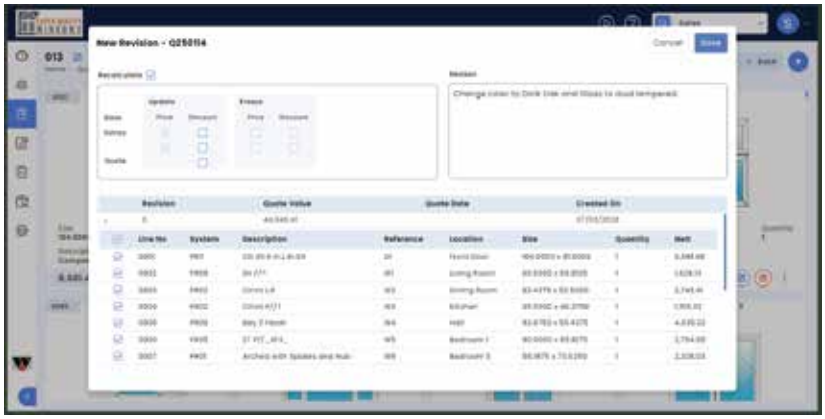

Efficiently quote for new construction projects. Manage survey, purchasing, production, delivery and installation in stages within phases.

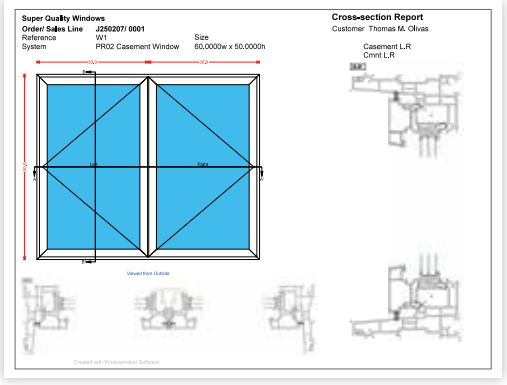

Revisions

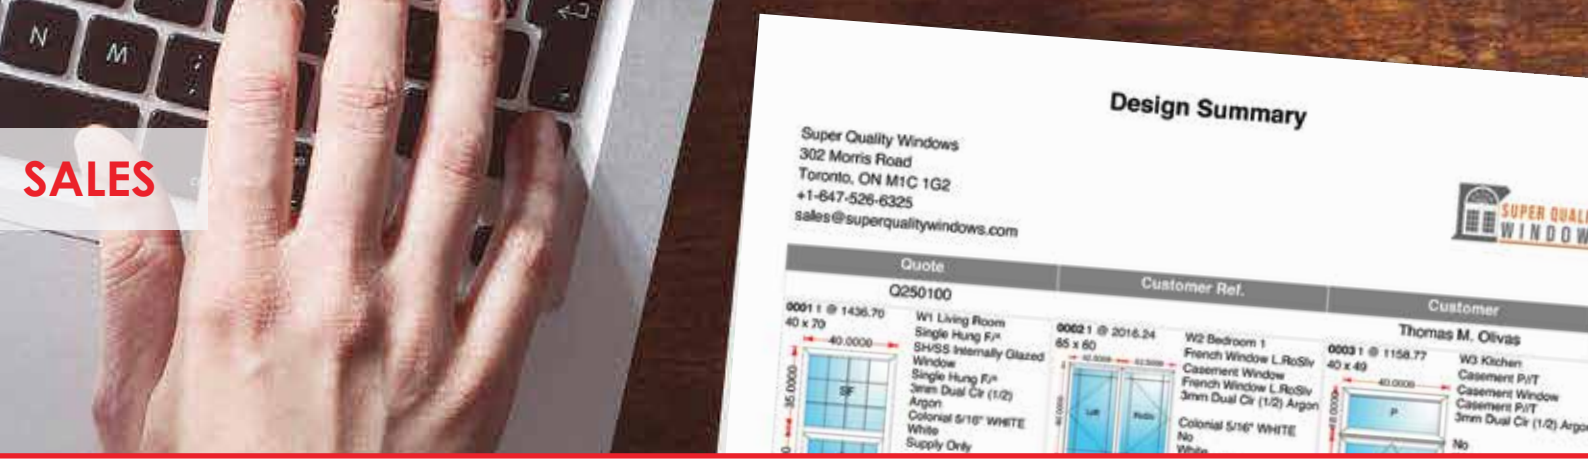

Quickly create alternative versions of quotes, making revisions effortless and helping you close more sales.

CAD Link

Export projects into CAD allowing you to produce technical drawings quickly and easily.

Sales - Retail

Quotation Documents

Produce professional looking quotations quickly and easily with our powerful configurator. Even manage large-scale phased projects for your major commercial customers.

Design Summary

A useful view to see the contents of the order by design. Key information is displayed per design.

Elevations

Windowmaker's Elevations function allows users to overlay the designed window onto a house image, providing a realistic representation of how the windows will look on the exterior of a building.

WINDOWMAKER MEASURE

Overview

Windowmaker Measure, available on Android as well as iOS, is an all-in-one surveying and quoting solution for installers, surveyors and sales people. It allows them to not only record measurements but also instantly generate and then e-share professional quotations and measuring reports.

Organise

Keep your projects in one place. Track all of your exported documents in your document library.

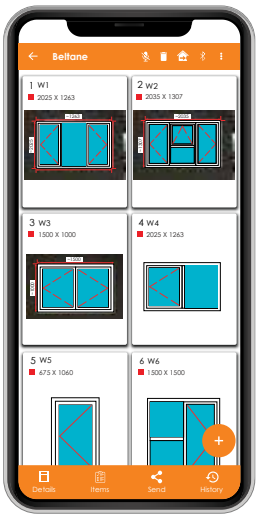

Measure

A digital survey sheet at your fingertips, with automatic frame size calculation. Simple, powerful interface for initial quoting & quick input. Link directly to your laser device & reduce human error.

Quote

High-quality quotes at the press of a button. Show your customer their window with our extensive selection of product styles. Send quotes & RFQs straight from your device.

OPERATIONS

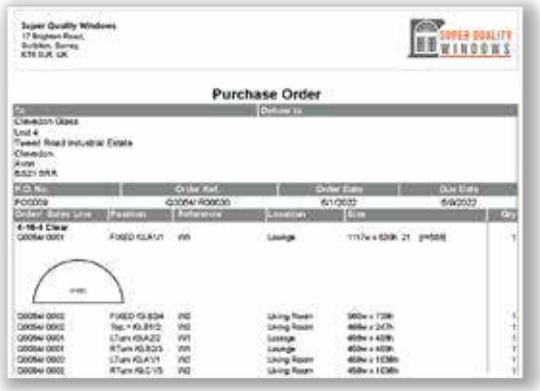

Schedule | Buy | Cut | Join

Scheduling

Windowmaker Scheduling enables you to take full control over all operations - Survey, Purchase, Production, Delivery and Installation by maintaining compatible schedules for each.

Purchasing

The Purchasing option allows you to generate and track Purchase Orders for both bought-to -order and stocked components. Send electronic purchase orders to the supplier, which they can import directly into their ordering system.

Purchase Order

Electronic Purchase Order for Glass

Manufacturing

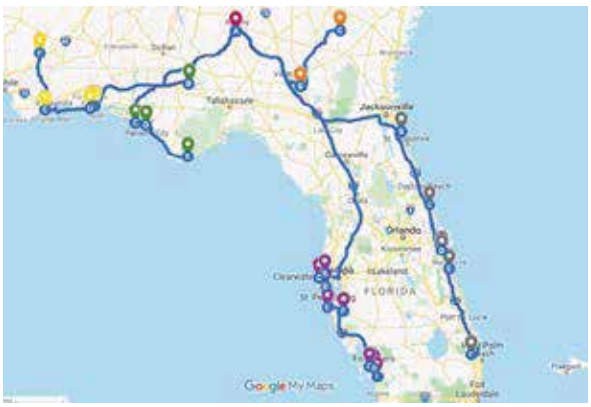

Plan your production considering capacity, order value, delivery dates, priority and other factors; day-wise or week-wise production across work shifts, production lines or even across sites. Optimise the use of available resources and reduce cycle time to maximise production floor throughput. Generate station-wise work instructions (printed reports, labels or control files for the machines).

Production Loading

Production Loading Report to assess Capacity Utilisation

Delivery

Plan delivery for a day/shift/vehicle from a production site on a particular route optimum use of resources. Generate the necessary documents/checklists (e.g. Delivery Notes, Picking Lists, Packing Slips). Easily move goods from one delivery to another to accommodate production schedules or customer requirements.

Delivery Route Optimisation

Integrated Scheduling and Management of Purchasing, Production, Delivery and Installation

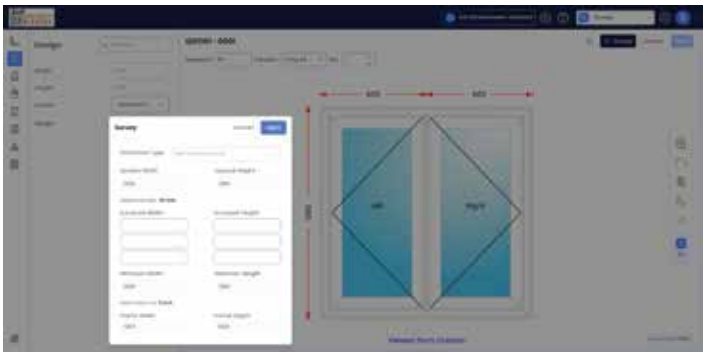

Hang

Glaze

Check

Survey and Installation

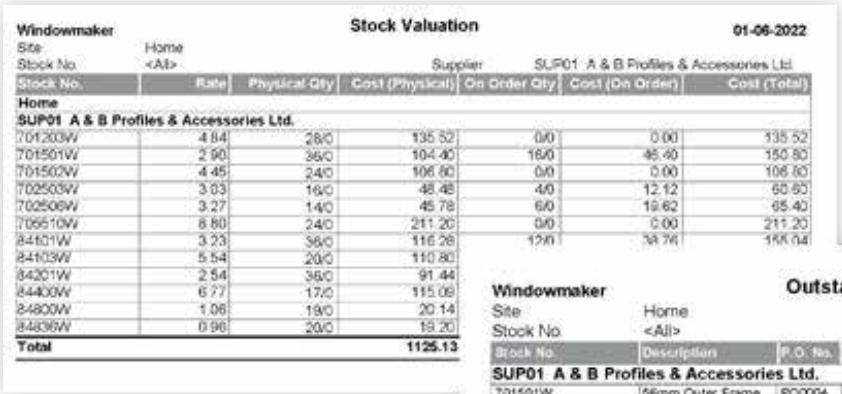

Schedule a Sales Order for survey/installation by an individual or a team, depending on their capacity, workload and availability. Monitor the capacity utilisation of individuals or teams. Shuffle and/or Split the allocated orders among multiple teams as required. Generate printed or electronic Survey Sheets.

Record Survey Sizes

Inventory / Stock

The Windowmaker Stock Control module enables you to know what, where and how much inventory is on hand, ordered and allocated. This helps with all activities surrounding effective sourcing, forecasting and replenishment of the inventory. It also minimises holding, replacement and shortage costs of inventories and maximises efficiency in production and delivery. Let Windowmaker take control of your inventory and give you peace of mind.

▶ Multiple Locations	▶ Surveying	▶ Remakes

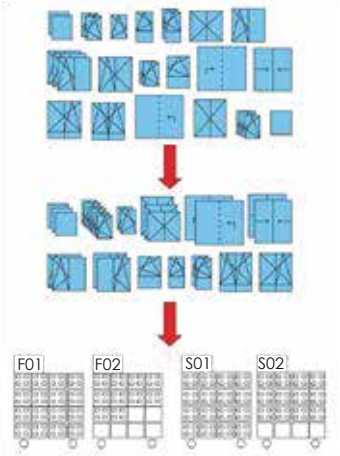

MANUFACTURING

Once Sales Orders are batched, Windowmaker processes them through Production with a range of optimisation options and the ability to fully automate your manufacturing.

Optimisation

Optimise profile and glass cutting to reduce raw material wastage, avoid offcuts, reduce production costs, improve productivity and achieve better stock management. Optimise the production sequence to improve efficiency and increase throughput.

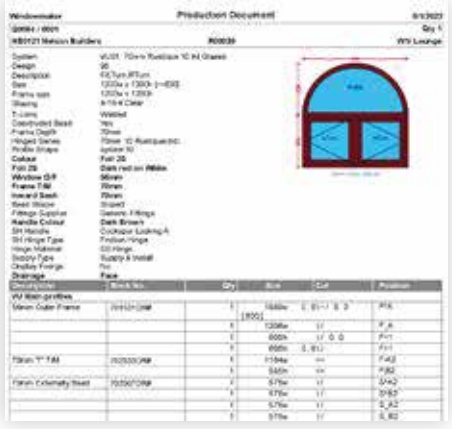

Sub-batching for Optimised Manufacturing

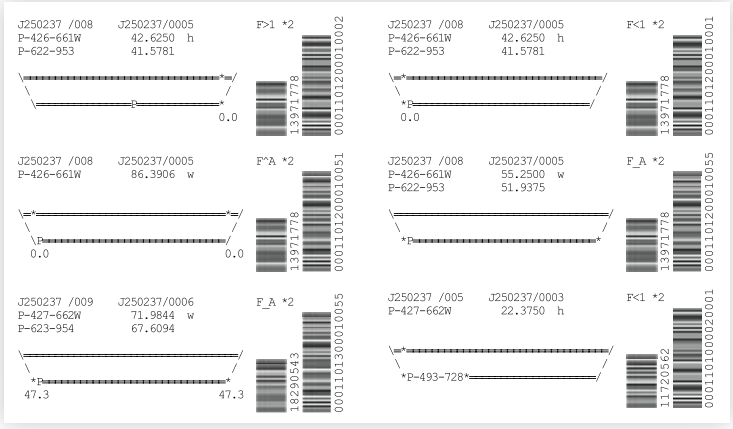

Sophisticated Automation

Works Instructions

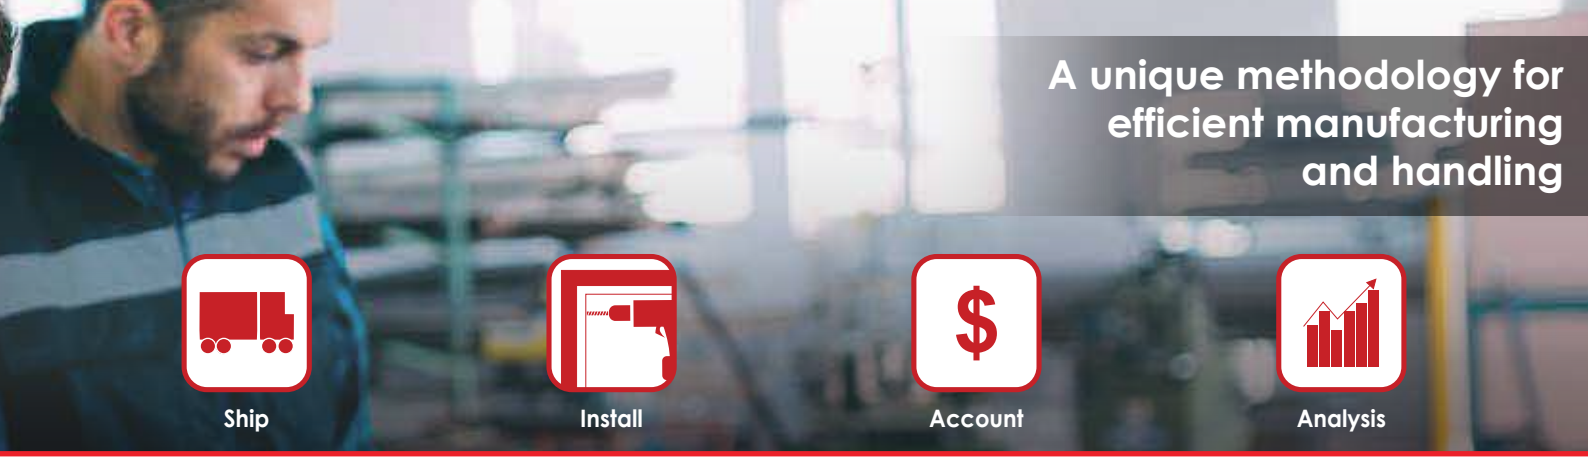

With the orders passed through into Production, Windowmaker can provide a variety of Works Instructions including Machine Links to saws, working centres, welders and glass-cutting tables

Bill of Materials

Profile Labels

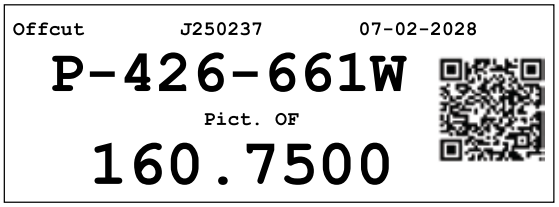

Tracking

Use barcode technology to keep track of products as they are manufactured and progress down the production line. The Tracking Client also provides clear and comprehensive Works Instructions including dynamically reprioritised Work-To Lists for each station operator. Labels can be printed at these screens.

On-screen Works Instructions at sash assembly — go paperless!

Offcut Label Tracking

Labels

Generate labels that can serve as work instructions at various stages of production, as well as during delivery and installation. The barcodes on the labels help identify and track the component and sub-assemblies throughout production and thereafter.
