Cermet Tipped Circular Saw Blades

These are Industrial grade Cermet Tipped circular saw blades for cutting of steel bars, steel rods and tube cutting.

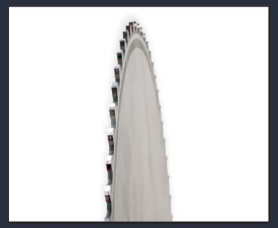

Cermet is a special product obtained through synthesizing ceramic dust, silicon carbides and metal oxides which are resistant to the highest temperatures such as chrome, cobalt, nickel, titanium, aluminum and tungsten.

Cermet is a material with hardness between silicon carbide and diamond.

It is very resistant to high cutting temperatures and is able to withstand extremely high machining rates.

Cermet generates an excellent surface finish on the cut material and an extra-long tool life.

Industrial Saw Blades Sharpening Center

We have installed latest & high precision range CNC machines (power star 850) of Loroch Sharp Solutions brand supplied by M/S VOLLMER Germany.

Our vision is to bring a change in thinking of clients of saw blade service industry. Keeping this in mind we have invested in high precision equipment that are capable of servicing of saw blades. It extends their life span of almost 70% to 80% as compared to tool life of the new saw blade.

All tooth profiles BW, HZ, BR can be produced.

High Reliability & Excellent Grinding Quality

Circular Saw Blades

The Saw Blade Company

www.circularsawsindia.com

ISO 9001:2015

Total Sawing Solution **Precisely The Best**

The Saw Blade Company

- Metal Cutting Solutions For Tubes & Pipes
- Saw Blades For Metal & Wood

Company

23 years of tradition

Saffaire Industrial saws (I) Pvt. Ltd is a leading Manufacturer, Importer, Exporter of Circular Saw Blades for Metal Working & Wood Working applications.

Our company specializes in the area of Sawing technology.

Since 1997, Saffaire Saws has been delivering superior quality saw blades to Steel tube manufacturers, automotive industry, Steel Plants, UPVC, Nonferrous and specialty markets With a particular focus on customer satisfaction.

We are located in the Millennium City of India-Gurgaon

We provide HM & HSS Circular Saw blades for sawing Steel Tubes & Pipes, TCT Saw Blades for UPVC & Non Ferrous Metals, ultra thin TCT saw blades for Aluminum & wood, TCT Wood working saw blades, Cermets Saw Blades for Billet Sawing, HM Flytek saw blades for Sawing Steel Pipes, Hot saw blades, Friction saws & segmental saw blades, TCT Saw Blades for rail sawing.

We have a Specialized Service Equipment for Saw Repairs.

Over the years, we have excelled in our field of activity by leveraging on our in depth industry expertise & knowledge.

Saffaire Saws sets standard for performance, excellence, quality service & we ensure the correct selection of saw blades for any application.

Circular Saws Supplied by us Cuts almost everything.

UPVC & ALUMINIUM

- TCT Saw Blades for window Aluminium. (Thin kerf)
- TCT Saw Blades for non-ferrous metal.
- TCT Saw Blades for UPVC & Industrial Aluminium

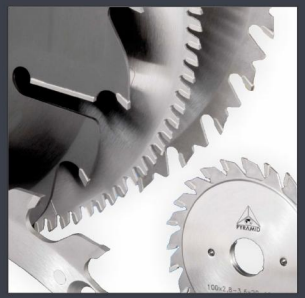

Wood Working Product Range.

High Performance Circular Saw Blades for Wood Working.
Material : Laminated chip board, MDF, HDL, HARD WOOD

- TCT Circular Saw Blades for Panel Sizing. <HIGH PERFORMANCE>
- TCT Saw Blades For Wood Processing.
- TCT Circular Saw Blades for Wood Trimming
- TCT Circular Saw Blades for Plywood
- TCT Saw Blades with super thin kerf for multi Ripping.
- TCT Saw Blades for Wood Cross Cutting.
- TCT Saw Blades for Bamboo.

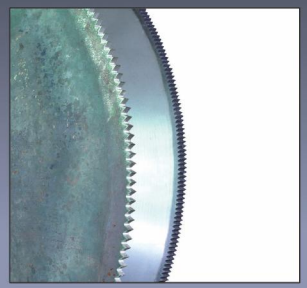

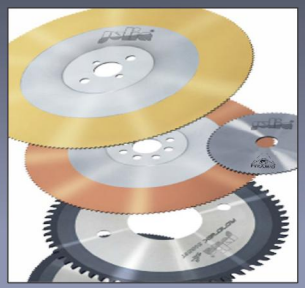

Metal Cutting product range.

Circular Saw Blades from Diameter 200 mm up to Diameter 2500mm.

- HSS Circular Saw Blades.
- Friction Saw Blades
- Hot Cutting Circular Saw Blades.
- HSS Segmental Saw Blades.
- Tungsten Carbide Tipped Circular Saw Blades For Non – Ferrous Metals.
- Tungsten Carbide Tipped for Steel Cutting.
- Cold Saw Blades (Cermet Saws)
- Flying Cut Tungsten Carbide Tipped Saw Blades for internal Scarf Tubes

Lowest Sawing Cost Per Cut, Longest Tool Life , That's The Guarantee Of Our Product.
