ENVISION

Specializes in Aluminium Punching machines &
Advance tools for doors and windows

Envision Machines

Envision Machines

Innovative Solutions for Aluminium Profile Punching

At **Envision Machines,** we specialize in designing and building cutting-edge **aluminium punching** machines and **advanced tooling solutions** for the window and door manufacturing industry. With over two years of experience, we provide reliable, high-performance machines and tools tailored to your needs.

Our Expertise

- **Advanced Aluminium Punching Machines:** From single-station pneumatic to hydraulic multi-station systems, we offer a range of machines for efficient, precise aluminium profile punching.
- **Custom Tools for Every Requirement:** Over 150+ different tools developed to work with a wide range of aluminium profile brands such as **schuco, Prominance, Aluking, Alupure, Vitco, Technal, Jindal, Hindalco and more.** We ensure your production runs smoothly with custom solutions that meet your exact needs.

Key Achievements

700+
Machines Delivered

We have successfully delivered our machines to clients across India and abroad, ensuring reliable operations worldwide.

Over 2500+
Tools

We have provided over 2500 specialized tools, ensuring our customers have the flexibility to handle various aluminium profile requirements with precision.

Interlock
Punching Machine

1 Station Pneumatic Aluminium
Punching Machine

1 Station Hydraulic Aluminium
Punching Machine

4 Station Hydraulic Aluminium
Punching Machine

8 Station Hydraulic Aluminium
Punching Machine

16 Station Hydraulic Aluminium
Punching Machine

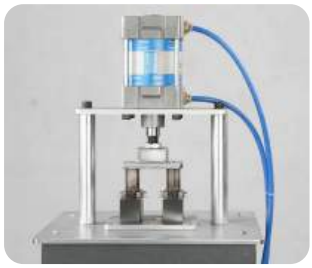

Reinforcement Steel
Punching Machine

Interlock punching machine

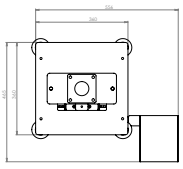

Key Features

- **Easy Guiding System:** Ensures accurate positioning of profiles.
- **Adjustable Cutting Depth:** Punch cutout depth can be adjusted
- Supports punching with or without interlock ribs.
- Adaptable to one-tool or multi-tool setups based on customer needs.

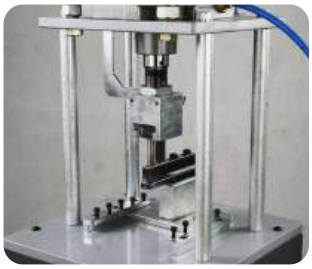

Specifications

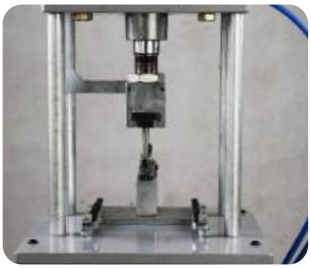

Machine Size	Compresed Air	Profile thickness	Operating Pressure	Cylinder Output Force	Machine weight
400 x 400 x 1200 mm (LxBxH)	UPVC profiles	2-5 mm	7–8 bar	300 kg	30 kg

We have pre-developed tools for leading UPVC profiles, compatible with brands like Prominance, Encraft, Aluplast, Deceuninck, Veka, Simta, Gealan, Kommerling, and Salamander.

1 station pneumatic aluminium punching machine

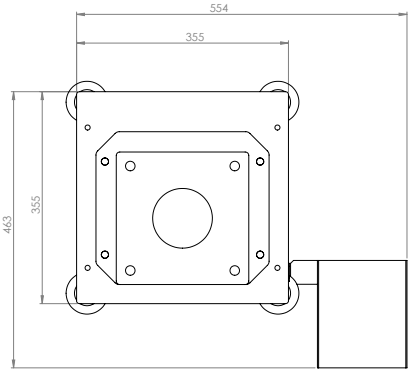

Key Features

- **Easy Guiding System:** Ensures accurate positioning of profiles.
- **Adjustable Cutting Depth:** Punch cutout depth can be adjusted
- Supports punching with or without interlock ribs.
- Adaptable to one-tool or multi-tool setups based on customer needs.

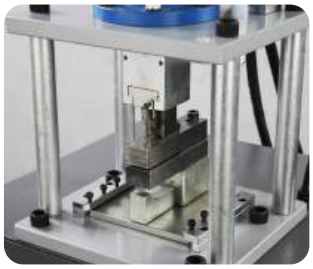

Specifications

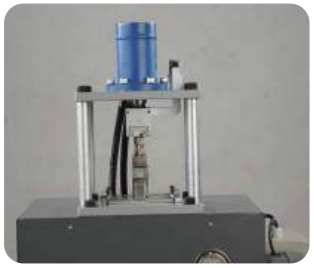

Machine Size	Compresed Air	Profile thickness
400 x 400 x 1200 mm (LxBxH)	Domal/Aluminium profiles	1.8 mm

Operating Pressure	Cylinder Output Force	Machine weight
8–10 bar	1.8 Ton	50 Kg

1 station hydraulic aluminium punching machine

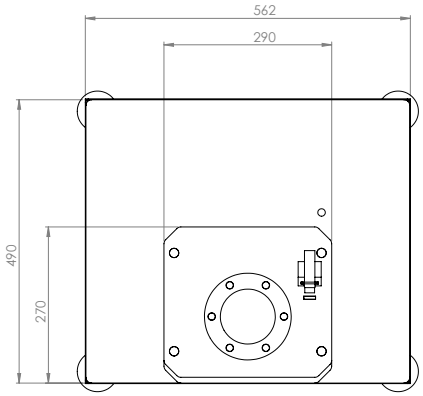

Key Features

- **Single-Die Changeover Mechanism:** Seamlessly swap multiple dies for varied punching needs.
- **High Capacity:** Handles up to 5 tons of punching force.
- **Robust and Stable Design:** Built for durability and precision.
- Ideal for precise and high-speed punching tasks

Specifications

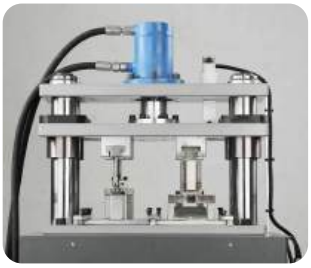

Machine Size	Input	Profile thickness
500 x 500 x 1200 mm (LxBxH)	3 Phase (2HP)	3-4 mm

Operating Pressure	Cylinder Output Force	Machine weight
140–160 bar	5 Ton	160 Kg

4 station hydraulic aluminium punching machine

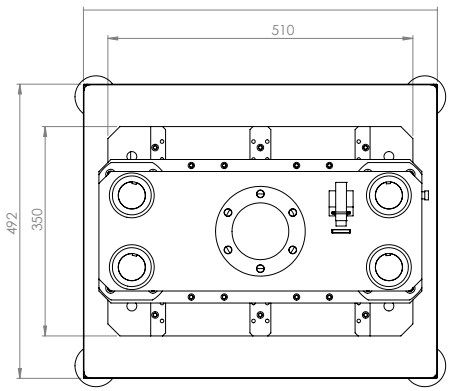

Key Features

- **Multi-Tool Support with quick change over:** Reduces setting time with four tools available at once.
- **Robust Build:** Ensures stability and durability for heavy-duty applications.
- **High Punching Speed:** Delivers consistent and precise results.

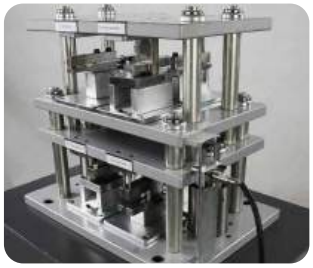

Specifications

Machine Size	Input	Profile thickness
600 x 500 x 1200 mm (LxBxH)	3 Phase (2 HP)	3-4 mm

Operating Pressure	Cylinder Output Force	Machine weight
140–160 bar	7 Ton	250 Kg

8 station hydraulic aluminium punching machine

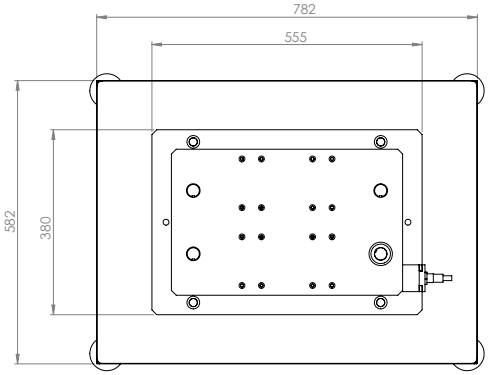

Key Features

- **Multi-Tool Capability:** Eight fixed tools reduce tool change time and enhance workflow efficiency.
- **Robust and Stable Build:** Handles demanding applications with reliability.
- **High Productivity:** Designed for fast and consistent punching operations.

Specifications

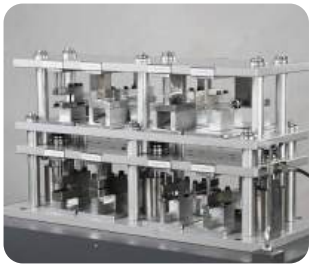

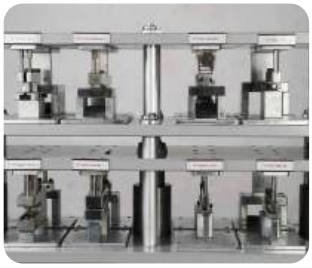

Machine Size	Input	Profile thickness
800 x 500 x 1200 mm (LxBxH)	3 phase (3HP)	3-4 mm

Operating Pressure	Cylinder Output Force	Machine weight
140–160 bar	8 Ton	350 Kg

16 station hydraulic aluminium punching machine

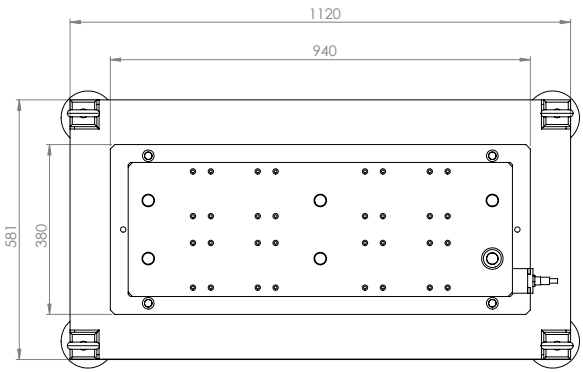

Key Features

- **Multi-Tool Capability:** 16 fixed tools streamline operations and reduce downtime.
- **Stability and Durability:** Robust construction for consistent performance.
- **Enhanced Productivity:** Faster punching speed with seamless workflow integration.

Specifications

Machine Size	Input	Profile thickness
1000 x 500 x 1200 mm (LxBxH)	3 Phase (3 HP)	3-4 mm

Operating Pressure	Cylinder Output Force	Machine weight
140–160 bar	12 Ton	600 Kg
