JINLONG NEW MATERIAL TECHNOLOGY CO LTD

Jinlong New Material Technology Co., Ltd. is a professional glass processing tools factory with more than 20 years experience. We built our factory in a glass industrial zone, which helps us a lot to improve our quality, all our new products must be tested thousands of times by our neighbor glass factories before presenting to the final market. Our company has a 15,000 Square meters newly built industrial zone in Jiangxi Province, with a stronger production and R&D team. Factory's main products include: Glass Drill bits, wheels, CNC glass tools and other glass tools which is used in many fields: photovoltaics, automobiles, construction, home appliances, furniture, electronics and other production fields. We have been exporting diamond tools to all over the world, and received more and more praise and suggestion from them, which helps us a lot on improving our product quality. Welcome to visit our Factory any time!
