

From Dec 5-7, 2024. LIFENG will showing at the Stand No.GL5 , where we look forward to show our latest innovations in high-speed and intelligent grinding technology.

At the exhibition, LIFENG will show:

**1. Full automatic grinding technology with High Precision and Reliability:** LIFENG double edging line make full automatic grinding piloting according to your order requirements.

50000 square meters workshop and 300 employee only concentrating on grinding machinery research and manufacturing.All processing by self advanced facility with high reliability control.

**2. Enhanced Productivity:** With a size-opening speed of 25m/min, our solutions are designed to improve your productivity, particularly for mixed-size production, offer a maximum processing speed of 20-30m/min, ensuring exceptional accuracy and reliability. Enhancing efficiency by up to 50%.

**3. Exclusive Order Management and Online Monitoring System:** Our self-developed MAC Viewer system seamlessly integrates with your ERP or MES system, providing visual, digital, and efficient grinding production management following orders. Expert Support for Industry 4.0.

**4. Versatile Integration:** Full solutions integrated with various processing machines, including automatic connection between cutting and tempering with our grinding sorting system, CNC round corner grinding machines, drilling/milling machines to optimize your production line for automation.

## **Solutions:**

LIFENG provides comprehensive full pre-processing and edging solutions:

- **Architectural Glass:** High speed rough grinding, fine polishing grinding, corner dubbing intelligent solutions.

- **Shower Glass:** Complete line solutions for professional processing with high polishing performance and other integrated solutions of drilling and cut-out.

- **Home Appliance Glass:** Automated straight grinding, pencil edging, corner dubbing or grooving integrated with other drilling and cut-out machines for efficient manufacturing.

Laser technology can be integrated for high efficient processing.

For more information about LIFENG, please visit our website and meet you in show:
