

Siderise CW-FS Firestop - keeping buildings safe since the 1990s

In partnership with

Siderise at a glance

This factory engineered, one-part, dry-fit firestop system is protecting properties across India - and here's five reasons why you should be using it on your project.

Comprehensively tested

CW-FS Firestop is a key component of our CW Perimeter Barrier Systems that have been comprehensively tested to EN 1364-4, ASTM E2307 and ASTM E2874 curtain wall fire test standards.

Best practice compliance

EN 1364-4 and ASTM E2307 tested systems offer a best practice path to compliance that meets regulatory requirements with spandrel protection and advanced perimeter edge firestop movement testing.

Outstanding fire resistance

Up to 3hrs / 180mins integrity and insulation for voids up to 250mm - in 'non-fire rated' curtain wall constructions.

Third-party certified

Confidence that our systems are consistently fit-for-purpose with certification from Certifire, Intertek, UL, and UL-EU, which takes into account cyclic movement ($\pm 10\%$).

One solution, one supplier, one warranty

Advanced perimeter fire containment with all products and ancillaries tested together in multiple test scenarios - and supplied in a single package with 'one warranty'.
