

Revolutionizing Modern Living: Window Techs Introduces Insulated Glass Blinds

Window Techs proudly unveils its latest innovation in glazing solutions: **Insulated Glass Blinds**. This cutting-edge product combines style, functionality, and sustainability, offering a seamless solution for modern architecture and interior design needs.

Engineered to perfection, Window Techs' insulated glass blinds feature integrated blinds housed between two glass panes. This innovative design ensures they remain dust-free, damage-free, and maintenance-free, all while delivering exceptional energy efficiency, noise reduction, and protection against UV rays and solar heat.

A Blend of Design and Functionality

Window Techs offers two versatile types of blinds to suit diverse applications:

1. **Venetian Blinds:**
 - Available in thicknesses of 20 mm, 23 mm, and 27 mm.
 - Offers louvers in 12 mm (for 20 & 23 mm air gaps) and 16 mm (for 23 & 27 mm air gaps).
 - Provides a sleek, minimalist aesthetic and superior light control.
2. **Honeycomb Blinds:**
 - Boasts a cellular structure that folds when closed.
 - Available in a 27 mm thickness with vertical or horizontal designs.
 - Reduces noise by up to 8 dB and achieves top-tier G Value for thermal insulation.

Smart Control for Modern Convenience

Window Techs' integrated blinds come with a range of control options tailored to user preferences:

- **Magnetic Operation:** Simplifies blind control with magnetic bars for movement and tilt adjustment.
- **Knob Operation:** Intuitive tilting mechanism through a rotatable knob.
- **Cord Operation:** Traditional cord functionality for hoisting and tilting the blinds.
- **Electric Control:** Advanced motorized operation through remote control, switches, or app-based systems. The blinds can even be programmed to adapt to sun movement and astronomical time settings—ideal for out-of-reach installations and multiple-panel setups.

Sustainability Meets Style

Insulated glass blinds are perfect for facades, allowing natural light to flood spaces while minimizing heat transfer for enhanced energy efficiency. They align with **AGBC/IGBC green building standards**, helping projects achieve sustainability goals.

Beyond façade applications, these blinds are ideal for **internal use** in glass partitions for hotels, offices, and residences. Their ability to merge elegance with practicality makes them a favorite among architects, designers, and homeowners alike.

Experience the Future of Smart Living

Window Techs' insulated glass blinds are redefining modern spaces with their unmatched performance, convenience, and environmental benefits.
